**D****GB****Codierung Tiguan, T-Roc mit VCDS, bitte beachten:**

Der nachfolgend beschriebene Ablauf zur Codierung bzw. Freischaltung auf Anhängerbetrieb dient lediglich zur allgemeinen Orientierung und kann je nach Modell (Motorisierung / Ausstattung) stark variieren. Gegebenenfalls müssen weniger oder noch weitere Steuergeräte angepasst werden.

- **Nach dem Verbinden mit VCDS muss in der _19 (Verbauliste) das Steuergerät „69 Anhängerfunktion“ auf > codiert gesetzt werden**
- **Codierung EZE_09 (Elektronisches Zentralelektrik-Steuergerät; möglicher Login 31347)**
Diagnose / Eigendiagnose / Vernetzungsplan
Eigendiagnose Steuergerät
Codieren; hitch_ecu > installed;
Bei Modellen (MJ 2017 >>) Anpassung > Kanal -Vernetzung Anhängeranschlussgerät > verbaut
- **Codierung ZKS_46 (Zentralmodul / Komfortsystem)**
trailer monitoring > auf aktiv setzen
trailer control unit > verbaut
- **Codierung_03 (Bremsenelektronik; Login 61378)**
Anpassung > Kanal - Gespannstabilisierung,
Wert auf > aktiviert setzen
- **Codierung SWA_3C (Spurwechselassistent)**
ECU for draw bar > with ECU for draw bar
- **Codierung SCH_17 (Schalttafeleinsatz)**
Trailer > ja
- **Codierung RFK_6C (Rückfahrkamerasystem)**
equipment_ahk > verbaut
- **Codierung STF_74 (Fahrwerkssteuerung)**
Anhänger > verbaut
- **Codierung EPH_76 (Einparkhilfe Steuergerät)**
Anhänger > Anhängervorrichtung manuell abnehmbar
- **Codierung DiS_13 (Distanzregelung Steuergerät, möglicher Login 20103);**
Control module for towing sens > verbaut oder
Control module for trailer recognition > verbaut
(Byte 03 Bit 03)
- **Codierung FFF_A5 (Frontsensorik Steuergerät)**
AAG > coded
- **Codierung HDE_6D (Heckdeckelelektronik Steuergerät)**
Anhänger > verbaut

Wichtiger Hinweis zu Codierung bzw. Freischaltung auf Anhängerbetrieb

Die vorab genannten Einstellungen werden im Bordnetz des Fahrzeugs vorgenommen und lokal abgespeichert. Bei generellen Updates der Fahrzeugsoftware (beispielsweise im Rahmen von Service- oder Instandsetzungsarbeiten) können diese Einstellungen unter Umständen wieder überschrieben und gelöscht werden. In diesem Fall muss die Freischaltung auf Anhängerbetrieb nach dem Update noch einmal lokal aktualisiert werden. Diagnosehinweise in Bezug auf Anhängerbetrieb, die bei Soll-/Ist- Vergleichen mit den im Herstellerwerk hinterlegten Daten auftreten können, liegen ggf. der lokalen Freischaltung zu Grunde.

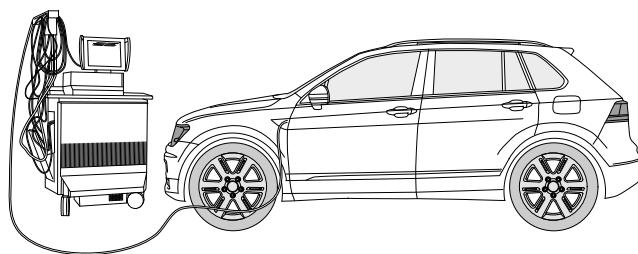

Coding Tiguan, T-Roc with VCDS, please note:

The procedure described below for encoding and enabling the trailer mode only serves for a general orientation and can vary greatly depending on the model (motorisation / equipment). If necessary less or further control units will have to be adapted.

- **After connecting to VCDS, the "69 trailer function" controller has to be set to encoded in the _19 installation list.**
- **Coding EZE_09 (electronic central electric controller; Login 31347)**
Diagnosis / Networking plan / Controller self-diagnosis
encode hitch_ecu > installed
Vehicles from (MJ 2017>>) adjustment > channel -integration trailer control unit > installed
- **Coding ZKS_46 (Central module convenience system)**
trailer monitoring > put on active trailer control unit > installed
- **Coding_03 (Brake Electronics; Login 61378)**
Adjustment > channel - trailer stabilization,
change value to > active
- **Encoding SWA_3C (Lane Change Assist)**
ECU for draw bar > with ECU for draw bar
- **Encoding SCH_17 (Dash panel insert)**

- **Encoding RFK_6C (reverse camera system)**
equipment_ahk > installed
- **Encoding STF_74 (chassis control system)**
Trailer > installed
- **Encoding EPH_76 (PDC controller)**
Trailer > trailer device can be removed manually
- **Encoding DiS_13 (controler distance control, possible Login 20103)**
Control module for towing sens > installed or
Control module for trailer recognition > installed
(Byte 03 Bit 03)
- **Encoding FFF_A5 (front sensor system controller)**
AAG > coded
- **Encoding HDE_6D (boot lid electronics controller)**
Trailer > installed

Important note on encoding and activating in trailer mode

The aforementioned settings are carried out in the vehicle's electrical system and saved locally. During general updates for the vehicle software (for example, within the scope of service or repair work) the settings may be overwritten and deleted under certain circumstances. At this case, the trailer mode activation has to be updated again locally after the update. Diagnostic information relating to the trailer mode that may appear during variance comparisons with the data saved in the manufacturer's works, may form the basis of the local activation

**F****Codage Tiguan, T-Roc avec VCDS, attention:**

La procédure de codage ou d'activation du fonctionnement avec remorque décrite ci-dessous sert uniquement d'orientation générale et peut varier fortement d'un modèle à l'autre (motorisation / équipement). Le cas échéant, il peut s'avérer nécessaire d'adapter moins ou d'autres dispositifs de commande.

- **Une fois la connexion avec VCDS établie, mettre l'appareil de commande «69 fonctionnement avec remorque sur «codé dans _19 la liste d'assemblage théorique**
- **Codage EZE_09 (appareil de commande de la centrale électrique électronique; Login 31347)**
Diagnostic / Pian de mise en réseau / Autodiagnosi appareil de commande, codage hitch_ecu > installed; Véhicules depuis (MJ 2017 >>) Ajustement > canal - intégration de l'unité de remorque > installée
- **Codage ZKS_46 (Système de commodité de module Central) trailer monitoring > mettre actif trailer control unit > monté**
- **Codage_03 (Électronique de freinage; Login 61378)**
Ajustement > canal – stabilisation de la remorque, valeur sur > activé
- **Codage SWA_3C (l'aide au changement de voie)**
ECU for draw bar > with ECU for draw bar
- **Codage SCH_17 (tableau de commande insert)**
Remorque > oui
- **Codage RFK_6C (Système de caméra de recul)**
equipment_ahk > monté
- **Codage STF_74 (Système de commande de chassis)**
Remorque > monté
- **Codage EPH_76 (aide au stationnement appareil de commande)**
Remorque > dispositif de remorque; démontable à la main
- **Codage DiS_13 (régulateur de distance appareil de commande, possibilité Login 20103)**
Control module for towing sens > monté ou
Control module for trailer recognition > monté (Byte 03 Bit 03)
- **Codierung FFF_A5 (capteurs avant appareil de commande)** AAG > coded
- **Codage HDE_6D (appareil de commande de l'électronique du hayon électrique)**
Remorque > monté

Remarque importante sur le codage ou sur l'activation du fonctionnement avec remorque

Les réglages mentionnés ci-dessus sont effectués dans le réseau de bord du véhicule et sauvegardés localement. Lors des mises à jour générales du logiciel du véhicule (par exemple dans le cadre de travaux de maintenance ou de réparation), ces réglages peuvent dans certaines circonstances être écrasés et supprimés. Dans ce cas, l'activation du fonctionnement avec remorque doit être à nouveau actualisée localement après la mise à jour. L'activation locale peut le cas échéant être causée par des remarques de diagnostic relatives au fonctionnement avec remorque susceptibles d'être générées lors de la comparaison entre valeurs théoriques/valeurs réelles effectuées avec les valeurs conservées dans l'usine du constructeur..

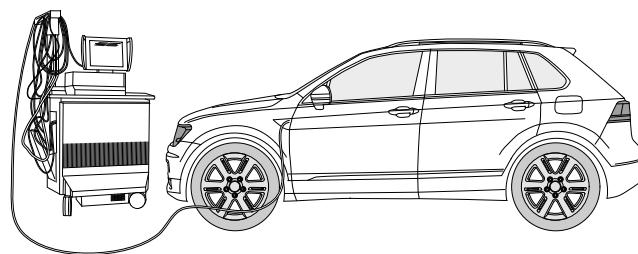

I**Codifica Tiguan, T-Roc con VCDS, attenzione:**

Esercizio rimorchio descritto qui di seguito serve esclusivamente come orientamento generale e può variare radicalmente a seconda del modello (motorizzazione / dotazione). È possibile che meno o altre centraline debbano essere adeguate.

- **Dopo la connessione con VCDS, nella lista. _19 d'installazione nominale la centrale 69 Funzione rimorchio" deve essere codificata.**
- **Codifica EZE_09 (centralina del sistema elettronico centrale elettronico; Login 31347)**
Schema di collegamento in rete / Autodiagnosi / centralina / codifica > hitch_ecu > installed
Veicolo da (MJ 2017>>) Regolazione -> canale-integrazione centralina rimorchio -> installata
- **Codifica ZKS_46 (Sistema di convenienza di modulo centrale)**
trailer monitoring > attivare / trailer control unit > installato
- **Codifica _03 (Frenatura elettronica; Login 61378)**

- **Codifica FFF_A5 (centralina sensori frontal)**
AAG > coded
- **Codifica HDE_6D (centralina sistema elettronico coperchio portabagagli)**
Rimorchio > installato

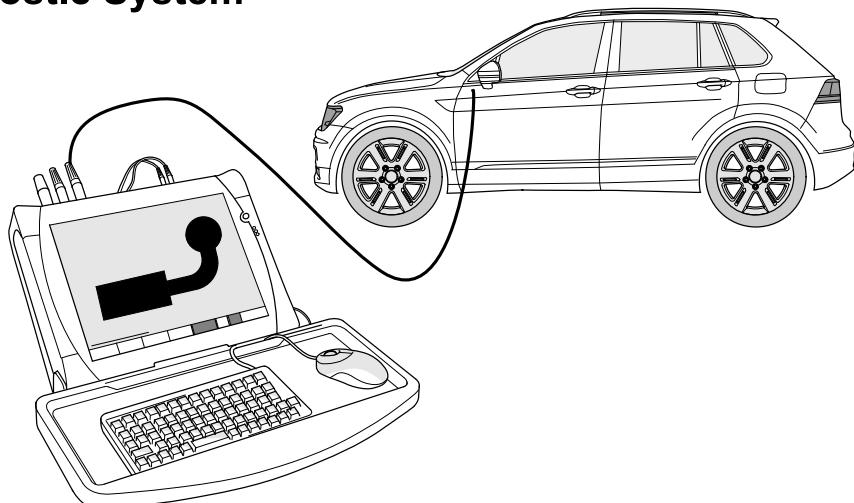

Avvertenza importante per la codifica _0. l'attivazione per funzionamento con rimorchio

Le impostazioni indicate in precedenza vengono effettuate nella rete di bordo del veicolo ememorizzate localmente. Nel caso di update generali dei software del veicolo (ad esempio n_ell'ambito d_ei lavori di assistenza e messa a punto), in particolari circostanze è possibile sovrascrivere e cancellare nuovamente queste impostazioni. In questo caso dopo l'update deve essere nuovamente aggiornata localmente l'attivazione per funzionamento con rimorchio. Le avvertenze di diagnosi in riferimento al funzionamento con rimorchio, generate durante una comparazione dei valori nominali/effettivi con i dati inseriti in fabbrica dal costruttore, potrebbero dipendere dall'attivazione locale

E	NL
<p>Codificación de Tiguan, T-Roc noc VCDS, por favor, tener en cuenta</p> <p>El proceso descrito codificación para la codificación y/o habilitación para el servicio con remolque sólo sirve para una orientación general y puede variar considerablemente dependiendo del modelo (motorización/equipamiento). - **Codage HDE_6D (appareil de commande de l'électronique du hayon électrique)**
Remorque > monté

Remarque importante sur le codage ou sur l'activation du fonctionnement avec remorque

Les réglages mentionnés ci-dessus sont effectués dans le réseau de bord du véhicule et sauvegardés localement. Lors des mises à jour générales du logiciel du véhicule (par exemple dans le cadre de travaux de maintenance ou de réparation), ces réglages peuvent dans certaines circonstances être écrasés et supprimés. Dans ce cas, l'activation du fonctionnement avec remorque doit être à nouveau actualisée localement après la mise à jour. L'activation locale peut le cas échéant être causée par des remarques de diagnostic relatives au fonctionnement avec remorque susceptibles d'être générées lors de la comparaison entre valeurs théoriques/valeurs réelles effectuées avec les valeurs conservées dans l'usine du constructeur..

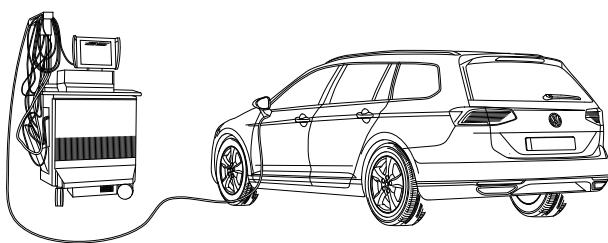

I**Codifica Passat B8 con VCDS, attenzione:**

Esercizio rimorchio descritto qui di seguito serve esclusivamente come orientamento generale e può variare radicalmente a seconda del modello (motorizzazione / dotazione). È possibile che meno o altre centraline debbano essere adeguate.

- **Dopo la connessione con VCDS, nella lista. _19 d'installazione nominale la centrale 69 Funzione rimorchio" deve essere codificata.**
- **Codifica EZE_09 (centralina del sistema elettronico centrale elettronico; Login 31347)**
Schema di collegamento in rete / Autodiagnosi / centralina / codifica > hitch_ecu > installed Veicolo da (MJ 2017>>) Regolazione -> canale-integrazione centralina rimorchio -> installata

Rimorchio > installato

Avvertenza importante per la codifica_o. l'attivazione per funzionamento con rimorchio

Le impostazioni indicate in precedenza vengono effettuate nella rete di bordo del veicolo ememorizzate localmente. Nel caso di update generali dei software del veicolo (ad esempio n_ell'ambito d_ei lavori di assistenza e messa a punto), in particolari circostanze è possibile sovrascrivere e cancellare nuovamente queste impostazioni. In questo caso dopo l'update deve essere nuovamente aggiornata localmente l'attivazione per funzionamento con rimorchio. Le avvertenze di diagnosi in riferimento al funzionamento con rimorchio, generate durante una comparazione dei valori nominali/effettivi con i dati inseriti in fabbrica dal costruttore, potrebbero dipendere dall'attivazione locale

E

NL

Codificación de Passat B8 noc VCDS, por favor, tener en cuenta

El proceso descrito codificación para la codificación y/o habilitación para el servicio con remolque sólo sirve para una orientación general y puede variar considerablemente dependiendo del modelo (motorización/equipamiento). En caso dado puede que tengan que adaptarse menos u otros reguladores.

- **Después de haber establecido la conexión con VCDS** se deberá ajustar el controlador 69 función de remolque" en _19 la lista de dispositivos a codificar
- **Codificación EZE_09 (controlador del sistema eléctrico central electrónico; Login 31347)**

Remolque > montado

Nota importante sobre la codificación y/o habilitación del modo remolque

Los ajustes anteriormente mencionados se llevan a cabo en el sistema eléctrico de a bordo y se guardan de forma local. Al realizar actualizaciones generales de software del vehículo (por ejemplo con motivo de trabajos de mantenimiento o reparación) es posible que estos ajustes se vuelvan a borrar y sobrescribir. En tal caso se deberá volver a actualizar la habilitación del modo remolque de forma local después de la actualización. Los avisos de diagnosis relacionados con el modo remolque, que puedan aparecer en caso de comparación de datos teóricos/reales con los datos depositados en la fábrica, se pueden deber a la habilitación local

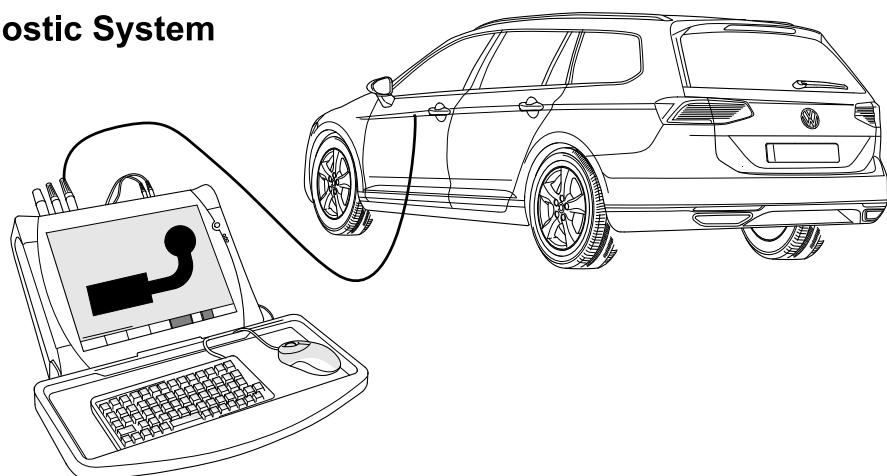

Codering Passat B8 met VCDS, let op a.u.b.:

Het hieronder omschreven proces voor de codering van de aanhangwagen functie dient uitsluitend ter algemene oriëntatie en kan afhankelijk van model (motorisering / uitvoering) sterk variëren. Indien nodig, moeten mindere of andere besturingsapparaten worden aangepast.

- **Na aansluiting met het on board diagnostisch systeem VCDS moet in de _19 installatie lijst, de regeleenheid '69- aanhangwagenfunctie' worden ingesteld alszijnde 'gecodeerd'.**

Aanhanger > geïnstalleerd

Belangrijke aanwijzing voor het coderen, dan wel deblokkeren van het anhangerbesturingssysteem

De eerder genoemde instellingen worden uitgevoerd op de boordcomputer van uw voertuig en ze worden lokaal opgeslagen. Het is echter mogelijk dat bij een algemene update van uw voertuigsoftware (bijvoorbeeld in het kader van een servicebeurt Of tijdens herstelwerkzaamheden) uw instellingen onder bepaalde omstandigheden worden overgeschreven dan wel gewist. In dat geval moet de deblokkening van het aanhangerbesturingssysteem na de update nog een keer lokaal worden geactualiseerd. Eventueel kunnen er diagnostische instructies/meldingen ten aanzien van het aanhangerbesturingssysteem worden gegenereerd door het feit dat er lokaal wordt gedeblonneerd - die situatie kan zich voordoen wanneer de fabrieksinstellingen worden gebruikt in vergelijkingen tussen een actuele en een gewenste situatie

Wichtiger Hinweis zu Codierung bzw. Freischaltung auf Anhängerbetrieb

Die vorab genannten Einstellungen werden im Bordnetz des Fahrzeuges vorgenommen und lokal abgespeichert . Bei generellen Updates der Fahrzeugsoftware (beispielsweise im Rahmen von Service- oder Instandsetzungsarbeiten) können diese Einstellungen unter Umständen wieder überschrieben und gelöscht werden. In diesem Fall muss die Freischaltung auf Anhängerbetrieb nach dem Update noch einmal lokal aktualisiert werden. Diagnosehinweise in Bezug auf Anhängerbetrieb, die bei Soll-/Ist- Vergleichen mit den im Herstellerwerk hinterlegten Daten auftreten können, liegen ggf. der lokalen Freischaltung zu Grunde.

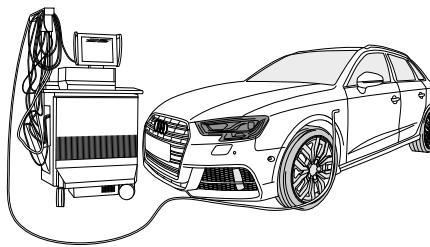

GB**Coding A3 with VCDS, please note:**

The procedure described below for encoding and enabling the trailer mode only serves for a general orientation and can vary greatly depending on the model (motorisation / equipment). If necessary less or further control units will have to be adapted.

- **After connecting to VCDS, the "69 trailer function" controller has to be set to encoded in the _19 installation list.**
- **Coding EZE_09 (electronic central electric controller; Login 31347)**

Trailer > installed

Important note on encoding and activating in trailer mode

The aforementioned settings are carried out in the vehicle's electrical system and saved locally. During general updates for the vehicle software (for example, within the scope of service or repair work) the settings may be overwritten and deleted under certain circumstances. At this case, the trailer mode activation has to be updated again locally after the update. Diagnostic information relating to the trailer mode that may appear during variance comparisons with the data saved in the manufacturer's works, may form the basis of the local activation

**F****Codage A3 avec VCDS, attention:**

La procédure de codage ou d'activation du fonctionnement avec remorque décrite ci-dessous sert uniquement d'orientation générale et peut varier fortement d'un modèle à l'autre (motorisation / équipement). Le cas échéant, il peut s'avérer nécessaire d'adapter moins ou d'autres dispositifs de commande.

- **Une fois la connexion avec VCDS établie, mettre l'appareil de commande «69 fonctionnement avec remorque sur «codé dans _19 la liste d'assemblage théorique**

Control module for trailer recognition > monté (Byte 03 Bit 03)
- **Codierung FFF_A5 (capteurs avant appareil de commande)** AAG > coded
- **Codage HDE_6D (appareil de commande de l'électronique du hayon électrique)**
Remorque > monté

Remarque importante sur le codage ou sur l'activation du fonctionnement avec remorque

Les réglages mentionnés ci-dessus sont effectués dans le réseau de bord du véhicule et sauvegardés localement. Lors des mises à jour générales du logiciel du véhicule (par exemple dans le cadre de travaux de maintenance ou de réparation), ces réglages peuvent dans certaines circonstances être écrasés et supprimés. Dans ce cas, l'activation du fonctionnement avec remorque doit être à nouveau actualisée localement après la mise à jour. L'activation locale peut le cas échéant être causée par des remarques de diagnostic relatives au fonctionnement avec remorque susceptibles d'être générées lors de la comparaison entre valeurs théoriques/valeurs réelles effectuées avec les valeurs conservées dans l'usine du constructeur..

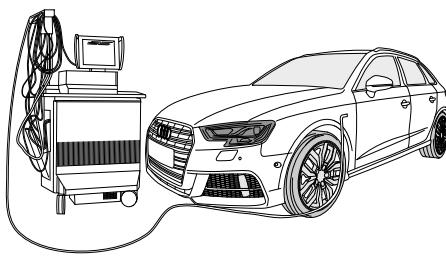

I**Codifica A3 con VCDS, attenzione:**

Esercizio rimorchio descritto qui di seguito serve esclusivamente come orientamento generale e può variare radicalmente a seconda del modello (motorizzazione / dotazione). È possibile che meno o altre centraline debbano essere adeguate.

- **Dopo la connessione con VCDS, nella lista. _19 d'installazione nominale la centrale 69 Funzione rimorchio" deve essere codificata.**
- **Codifica EZE_09 (centralina del sistema elettronico centrale elettronico; Login 31347)**
Schema di collegamento in rete / Autodiagnosi / centralina / codifica > hitch_ecu > installed Veicolo da (MJ 2017 >>) Regolazione -> canale-integrazione centralina rimorchio -> installata
- **Codifica ZKS_46 (Sistema di convenienza di modulo centrale)**
trailer monitoring > attivare / trailer control unit > installato
- **Codifica _03 (Frenatura elettronica; Login 61378)**

- **Codifica FFF_A5 (centralina sensori frontali)**
AAG > coded
- **Codifica HDE_6D (centralina sistema elettronico coperchio portabagagli)**
Rimorchio > installato

Avvertenza importante per la codifica _0. l'attivazione per funzionamento con rimorchio

Le impostazioni indicate in precedenza vengono effettuate nella rete di bordo del veicolo ememorizzate localmente. Nel caso di update generali dei software del veicolo (ad esempio n_ell'ambito d_ei lavori di assistenza e messa a punto), in particolare in circostanze è possibile sovrascrivere e cancellare nuovamente queste impostazioni. In questo caso dopo l'update deve essere nuovamente aggiornata localmente l'attivazione per funzionamento con rimorchio. Le avvertenze di diagnosi in riferimento al funzionamento con rimorchio, generate durante una comparazione dei valori nominali/effettivi con i dati inseriti in fabbrica dal costruttore, potrebbero dipendere dall'attivazione locale

E

NL

Codificación de A3 noc VCDS, por favor, tener en cuenta

El proceso descrito codificación para la codificación y/o habilitación para el servicio con remolque sólo sirve para una orientación general y puede variar considerablemente dependiendo del modelo (motorización/equipamiento). En caso dado puede que tengan que adaptarse menos u otros reguladores.

- **Después de haber establecido la conexión con VCDS se deberá ajustar el controlador 69 función de remolque" en _19 la lista de dispositivos a codificar**
- **Codificación EZE_09 (controlador del sistemaeléctrico central electrónico; Login 31347)**
Esquema de interconexión / Autodiagnosis del controlador Codificación hitch_ecu > installed;
Vehículos desde (MJ 2017 >>) Adaptación -> canal - integración de la unidad de remolque -> instalada
- **Codificación ZKS_46 (Sistema de confort de módulo central) trailer monitoring > poner en activo trailer control unit > montado**
- **Codificación _03 (Frenos Electrónica; Login 61378)**
Adaptación > canal - estabilización del remolque, valor en > activado
- **Codificación SWA_3C (asistente de carnbio de caml)**
ECU for draw bar > with ECU for draw bar
- **Codificación SCH_17 (Cuadro de instrumentos)**
Trailer > si
- **Codificación RFK_6C (sistema de cámara de reversa)**

Control module for trailer recognition > montado (Byte 03 Bit 03)
- **Codificación FFF_A5 (controlador del sistema de sensores trontales)** AAG > coded
- **Codificación HDE_6D (controlador del sistema electrónico de la puerta del maletero)**
Remolque > montado

Nota importante sobre la codificación y/o habilitación del modo remolque

Los ajustes anteriormente mencionados se llevan a cabo en el sistema eléctrico de a bordo y se guardan de forma local. Al realizar actualizaciones generales de software del vehículo (por ejemplo con motivo de trabajos de mantenimiento o reparación) es posible que estos ajustes se vuelvan a borrar y sobrescribir. En tal caso se deberá volver a actualizar la habilitación del modo remolque de forma local después de la actualización. Los avisos de diagnosis relacionados con el modo remolque, que puedan aparecer en caso de comparación de datos teóricos/reales con los datos depositados en la fábrica, se pueden deber a la habilitación local

Codering A3 met VCDS, let op a.u.b.:

Het hieronder omschreven proces voor de codering van de aanhangwagen functie dient uitsluitend ter algemene oriëntatie en kan afhankelijk van model (motorisering / uitvoering) sterk variëren. Indien nodig, moeten mindere of andere besturingsapparaten worden aangepast.

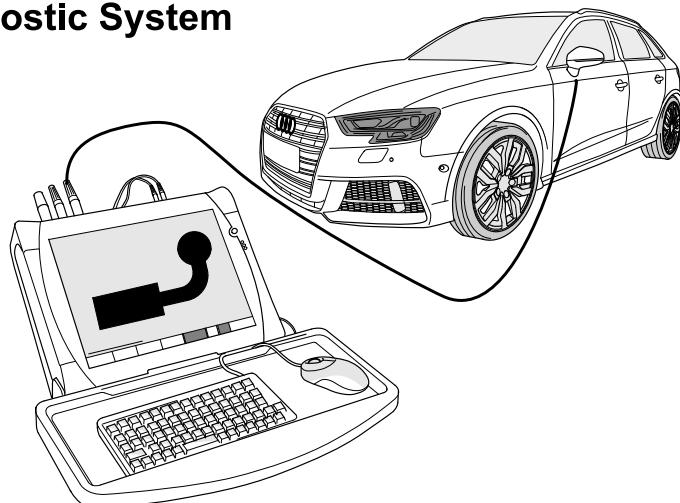

- **Na aansluiting met het on board diagnostisch systeem VCDS moet in de _19 installatie lijst, de regeleenheid '69- aanhangwagenfunctie' worden ingesteld alszijnde 'gecodeerd'.**
- **Codering EZE_09 (Aansturingsapparaat voor .de elektronische centrale elektriciteitsvoorziening; Login 31347)**

- **Codering FFF_A5 (controller sensoren voorzijde)**
AAG > coded
- **Codering HDE_6D (controller achterklepelectronica)**
Aanhanger > geïnstalleerd

Belangrijke aanwijzing voor het coderen, dan wel deblokkeren van het anhangerbesturingssysteem

De eerder genoemde instellingen worden uitgevoerd op de boordcomputer van uw voertuig en ze worden lokaal opgeslagen. Het is echter mogelijk dat bij een algemene update van uw voertuigsoftware (bijvoorbeeld in het kader van een servicebeurt Of tijdens herstelwerkzaamheden) uw instellingen onder bepaalde omstandigheden worden overgeschreven dan wel gewist. In dat geval moet de deblokkenning van het aanhangerbesturingssysteem na de update nog een keer lokaal worden geactualiseerd. Eventueel kunnen er diagnostische instructies/meldingen ten aanzien van het aanhangerbesturingssysteem worden gegenereerd door het feit dat er lokaal wordt gedeblokkeerd - die situatie kan zich voordoen wanneer de fabrieksinstellingen worden gebruikt in vergelijkingen tussen een actuele en een gewenste situatie

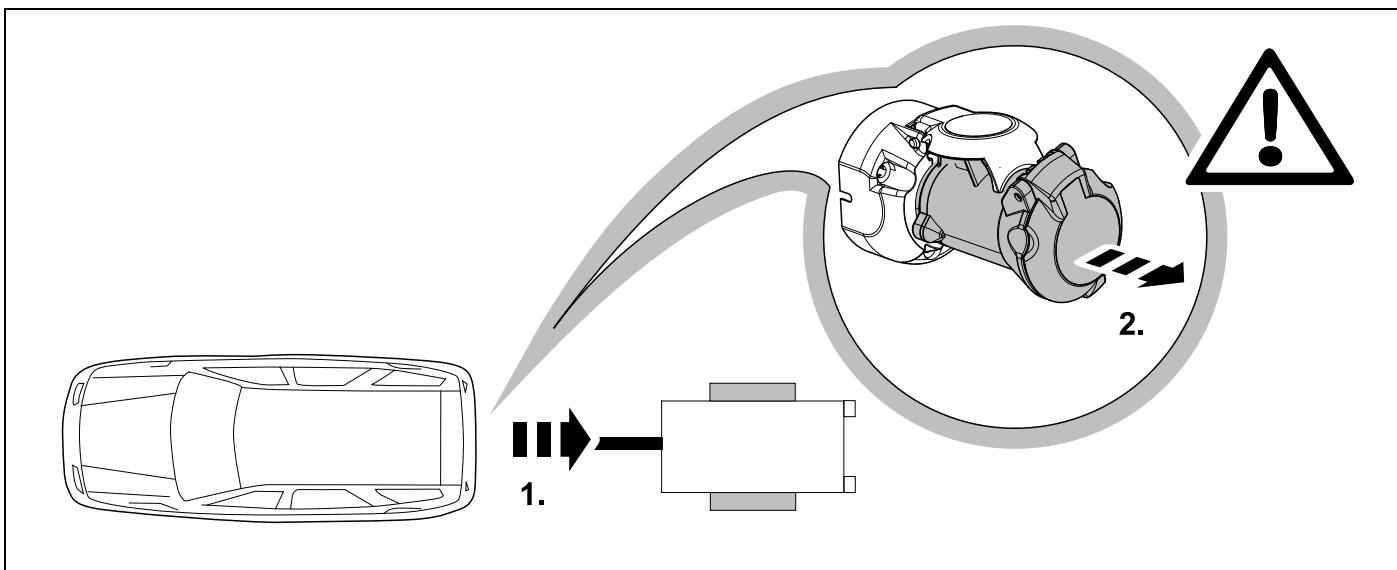

OPTION B - vehicle coding

Diagnostic System

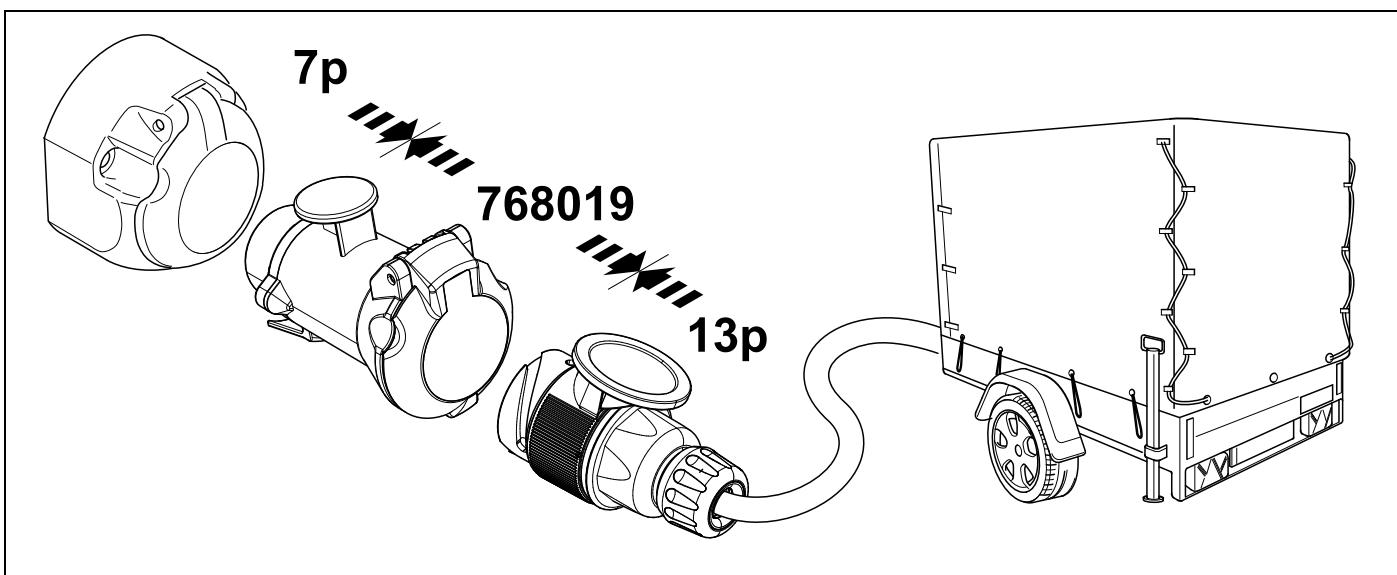

D	GB	F
<p>Die Aktivierung der Anhängerfunktionen im Fahrzeug wird hier beispielhaft an einem Diagnose-System Hella Gutmann mega macs PC (V52) beschrieben:</p> <ol style="list-style-type: none"> 1. Anhänger > verbaut

Wichtiger Hinweis zu Codierung bzw. Freischaltung auf Anhängerbetrieb

Die vorab genannten Einstellungen werden im Bordnetz des Fahrzeuges vorgenommen und lokal abgespeichert. Bei generellen Updates der Fahrzeugsoftware (beispielsweise im Rahmen von Service- oder Instandsetzungsarbeiten) können diese Einstellungen unter Umständen wieder überschrieben und gelöscht werden. In diesem Fall muss die Freischaltung auf Anhängerbetrieb nach dem Update noch einmal lokal aktualisiert werden. Diagnosehinweise in Bezug auf Anhängerbetrieb, die bei Soll-/Ist- Vergleichen mit den im Herstellerwerk hinterlegten Daten auftreten können, liegen ggf. der lokalen Freischaltung zu Grunde.

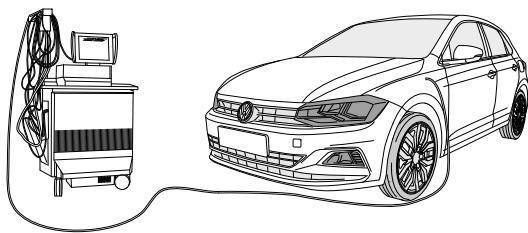

Coding Polo 6 with VCDS, please note:

The procedure described below for encoding and enabling the trailer mode only serves for a general orientation and can vary greatly depending on the model (motorisation / equipment). If necessary less or further control units will have to be adapted.

- **After connecting to VCDS, the "69 trailer function" controller has to be set to encoded in the _19 installation list.**
- **Coding EZE_09 (electronic central electric controller; Login 31347)**
Diagnosis / Networking plan / Controller self-diagnosis
encode hitch_ecu > installed
Vehicles from (MJ 2017>>) adjustment > channel -integration trailer control unit > installed
- **Coding ZKS_46 (Central module convenience system)**

Control module for towing sens > installed or
Control module for trailer recognition > installed
(Byte 03 Bit 03)
- **Encoding FFF_A5 (front sensor system controller)**
AAG > coded
- **Encoding HDE_6D (boot lid electronics controller)**
Trailer > installed

Important note on encoding and activating in trailer mode

The aforementioned settings are carried out in the vehicle's electrical system and saved locally. During general updates for the vehicle software (for example, within the scope of service or repair work) the settings may be overwritten and deleted under certain circumstances. At this case, the trailer mode activation has to be updated again locally after the update. Diagnostic information relating to the trailer mode that may appear during variance comparisons with the data saved in the manufacturer's works, may form the basis of the local activation

I

Codage Polo 6 avec VCDS, attention:

La procédure de codage ou d'activation du fonctionnement avec remorque décrite ci-dessous sert uniquement d'orientation générale et peut varier fortement d'un modèle à l'autre (motorisation / équipement). Le cas échéant, il peut s'avérer nécessaire d'adapter moins ou d'autres dispositifs de commande.

- **Une fois la connexion avec VCDS établie, mettre l'appareil de commande «69 fonctionnement avec remorque sur «codé dans _19 la liste d'assemblage théorique**
- **Codage EZE_09 (appareil de commande de la centrale électrique électronique; Login 31347)**
Diagnostic / Plan de mise en réseau / Autodiagnostic appareil de commande, codage hitch_ecu > installed; Véhicules depuis (MJ 2017 >>) Ajustement > canal - intégration de l'unité de remorque > installée
- **Codage ZKS_46 (Système de commodité de module Central) trailer monitoring > mettre actif trailer control unit > monté**
- **Codage_03 (Électronique de freinage; Login 61378)**
Ajustement > canal – stabilisation de la remorque, valeur sur > activé

- **Codage DiS_13 (régulateur de distance appareil de commande, possibilité Login 20103)**
Control module for towing sens > monté ou
Control module for trailer recognition > monté (Byte 03 Bit 03)
- **Codierung FFF_A5 (capteurs avant appareil de commande)** AAG > coded
- **Codage HDE_6D (appareil de commande de l'électronique du hayon électrique)**
Remorque > monté

Remarque importante sur le codage ou sur l'activation du fonctionnement avec remorque

Les réglages mentionnés ci-dessus sont effectués dans le réseau de bord du véhicule et sauvegardés localement. Lors des mises à jour générales du logiciel du véhicule (par exemple dans le cadre de travaux de maintenance ou de réparation), ces réglages peuvent dans certaines circonstances être écrasés et supprimés. Dans ce cas, l'activation du fonctionnement avec remorque doit être à nouveau actualisée localement après la mise à jour. L'activation locale peut le cas échéant être causée par des remarques de diagnostic relatives au fonctionnement avec remorque susceptibles d'être générées lors de la comparaison entre valeurs théoriques/valeurs réelles effectuées avec les valeurs conservées dans l'usine du constructeur..

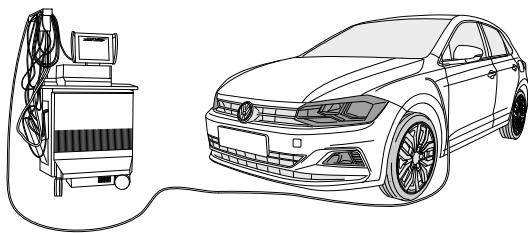

Codifica Polo 6 con VCDS, attenzione:

Esercizio rimorchio descritto qui di seguito serve esclusivamente come orientamento generale e può variare radicalmente a seconda del modello (motorizzazione / dotazione). È possibile che meno o altre centraline debbano essere adeguate.

- **Dopo la connessione con VCDS, nella lista. _19 d'installazione nominale la centrale 69 Funzione rimorchio" deve essere codificata.**
- **Codifica EZE_09 (centralina del sistema elettronico centrale elettronico; Login 31347)**
Schema di collegamento in rete / Autodiagnosi / centralina / codifica > hitch_ecu > installed
Veicolo da (MJ 2017>>) Regolazione -> canale-integrazione centralina rimorchio -> installata

Rimorchio > installato

Avvertenza importante per la codifica_o. l'attivazione per funzionamento con rimorchio

Le impostazioni indicate in precedenza vengono effettuate nella rete di bordo del veicolo ememorizzate localmente. Nel caso di update generali dei software del veicolo (ad esempio n_ell'ambito d_ei lavori di assistenza e messa a punto), in particolare in circostanze è possibile sovrascrivere e cancellare nuovamente queste impostazioni. In questo caso dopo l'update deve essere nuovamente aggiornata localmente l'attivazione per funzionamento con rimorchio. Le avvertenze di diagnosi in riferimento al funzionamento con rimorchio, generate durante una comparazione dei valori nominali/effettivi con i dati inseriti in fabbrica dal costruttore, potrebbero dipendere dall'attivazione locale

E

Codificación de Polo 6 noc VCDS, por favor, tener en cuenta

El proceso descrito codificación para la codificación y/o habilitación para el servicio con remolque sólo sirve para una orientación general y puede variar considerablemente dependiendo del modelo (motorización/equipamiento). En caso dado puede que tengan que adaptarse menos a otros reguladores.

- **Después de haber establecido la conexión con VCDS** se deberá ajustar el **controlador 69 función de remolque** en **_19 la lista de dispositivos a codificar**
- **Codificación EZE_09 (controlador del sistemaeléctrico central electrónico; Login 31347)**
Esquema de interconexión / Autodiagnosis del controlador
Codificación hitch_ecu > installed;
Vehículos desde (MJ 2017 >>) Adaptación -> canal - integración de la unidad de remolque -> instalada
- **Codificación ZKS_46 (Sistema de confort de módulo central) trailer monitoring > poner en activo trailer control unit > montado**
- **Codificación _03 (Frenos Electrónica; Login 61378)**
Adaptación > canal - estabilización del remolque, valor en > activado

- **Codificación DiS_13 (controlador del sistema de regulación de distancia, Login de acceso posible 20103)**
Control module for towing sens > montado o
Control module for trailer recognition > montado (Byte 03 Bit 03)
- **Codificación FFF_A5 (controlador del sistema de sensores trontales)** AAG > coded
- **Codificación HDE_6D (controlador del sistema electrónico de la puerta del maletero)**
Remolque > montado

Nota importante sobre la codificación y/o habilitación del modo remolque

Los ajustes anteriormente mencionados se llevan a cabo en el sistema eléctrico de a bordo y se guardan de forma local. Al realizar actualizaciones generales de software del vehículo (por ejemplo con motivo de trabajos de mantenimiento o reparación) es posible que estos ajustes se vuelvan a borrar y sobrescribir. En tal caso se deberá volver a actualizar la habilitación del modo remolque de forma local después de la actualización. Los avisos de diagnosis relacionados con el modo remolque, que puedan aparecer en caso de comparación de datos teóricos/reales con los datos depositados en la fábrica, se pueden deber a la habilitación local

Codering Polo 6 met VCDS, let op a.u.b.:

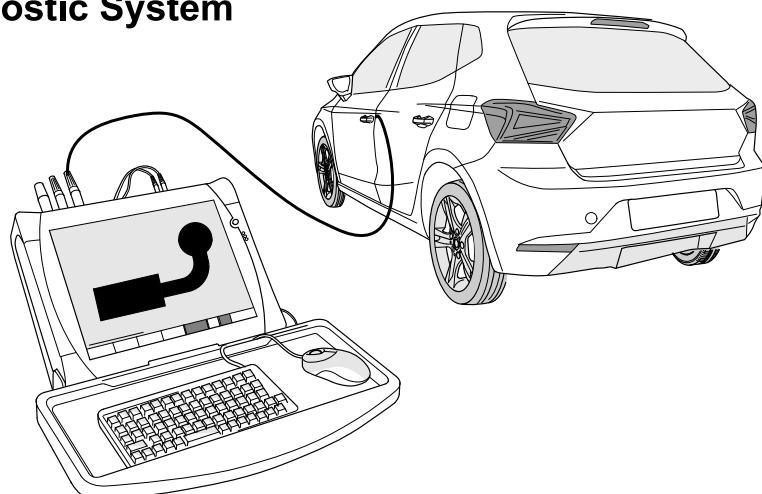

Het hieronder omschreven proces voor de codering van de aanhangwagen functie dient uitsluitend ter algemene oriëntatie en kan afhankelijk van model (motorisering / uitvoering) sterk variëren. Indien nodig, moeten mindere of andere besturingsapparaten worden aangepast.

- **Na aansluiting met het on board diagnostisch systeem VCDS moet in de _19 installatie lijst, de regeleenheid '69- aanhangwagenfunctie' worden ingesteld alszijnde 'gecodeerd'.**
- **Codering EZE_09 (Aansturingsapparaat voor .de elektronische centrale elektriciteitsvoorziening; Login 31347)**

Aanhanger > geïnstalleerd

Belangrijke aanwijzing voor het coderen, dan wel deblokkeren van het anhangerbesturingssysteem

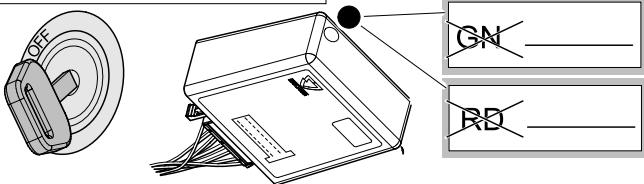

De eerder genoemde instellingen worden uitgevoerd op de boordcomputer van uw voertuig en ze worden lokaal opgeslagen. Het is echter mogelijk dat bij een algemene update van uw voertuigsoftware (bijvoorbeeld in het kader van een servicebeurt Of tijdens herstelwerkzaamheden) uw instellingen onder bepaalde omstandigheden worden overgeschreven dan wel gewist. In dat geval moet de deblokkenning van het aanhangerbesturingssysteem na de update nog een keer lokaal worden geactualiseerd. Eventueel kunnen er diagnostische instructies/meldingen ten aanzien van het aanhangerbesturingssysteem worden gegenereerd door het feit dat er lokaal wordt gedeblokkeerd - die situatie kan zich voordoen wanneer de fabrieksinstellingen worden gebruikt in vergelijkingen tussen een actuele en een gewenste situatie

Diagnostic System

Please check the voucher added to this wiringkit and learn how to program this wiringkit with Jifeline.

**D****GB****Codierung Golf 7 mit VCDS, bitte beachten:**

Der nachfolgend beschriebene Ablauf zur Codierung bzw. Freischaltung auf Anhängerbetrieb dient lediglich zur allgemeinen Orientierung und kann je nach Modell (Motorisierung / Ausstattung) stark variieren. Gegebenenfalls müssen weniger oder noch weitere Steuergeräte angepasst werden.

- **Nach dem Verbinden mit VCDS muss in der _19 (Verbauliste) das Steuergerät „69 Anhängerfunktion“ auf > codiert gesetzt werden**
- **Codierung EZE_09 (Elektronisches Zentralelektrik-Steuergerät; möglicher Login 31347)**
Diagnose / Eigendiagnose / Vernetzungsplan
Eigendiagnose Steuergerät
Codieren; hitch_ecu > installed;
Bei Modellen (MJ 2017 >>) Anpassung > Kanal -Vernetzung Anhängeranschlussgerät > verbaut
- **Codierung ZKS_46 (Zentralmodul / Komfortsystem)**
trailer monitoring > auf aktiv setzen
trailer control unit > verbaut
- **Codierung _03 (Bremsenelektronik; Login 61378)**
Anpassung > Kanal - Gespannstabilisierung,
Wert auf > aktiviert setzen
- **Codierung SWA_3C (Spurwechselassistent)**
ECU for draw bar > with ECU for draw bar
- **Codierung SCH_17 (Schalttafeleinsatz)**
Trailer > ja
- **Codierung RFK_6C (Rückfahrkamerasystem)**
equipment_ahk > verbaut
- **Codierung STF_74 (Fahrwerkssteuerung)**
Anhänger > verbaut
- **Codierung EPH_76 (Einparkhilfe Steuergerät)**
Anhänger > Anhängervorrichtung manuell abnehmbar
- **Codierung DiS_13 (Distanzregelung Steuergerät, möglicher Login 20103);**
Control module for towing sens > verbaut oder
Control module for trailer recognition > verbaut
(Byte 03 Bit 03)
- **Codierung FFF_A5 (Frontsensorik Steuergerät)**
AAG > coded
- **Codierung HDE_6D (Heckdeckelelektronik Steuergerät)**
Anhänger > verbaut

Wichtiger Hinweis zu Codierung bzw. Freischaltung auf Anhängerbetrieb

Die vorab genannten Einstellungen werden im Bordnetz des Fahrzeuges vorgenommen und lokal abgespeichert. Bei generellen Updates der Fahrzeugsoftware (beispielsweise im Rahmen von Service- oder Instandsetzungsarbeiten) können diese Einstellungen unter Umständen wieder überschrieben und gelöscht werden. In diesem Fall muss die Freischaltung auf Anhängerbetrieb nach dem Update noch einmal lokal aktualisiert werden. Diagnosehinweise in Bezug auf Anhängerbetrieb, die bei Soll-/Ist- Vergleichen mit den im Herstellerwerk hinterlegten Daten auftreten können, liegen ggf. der lokalen Freischaltung zu Grunde.

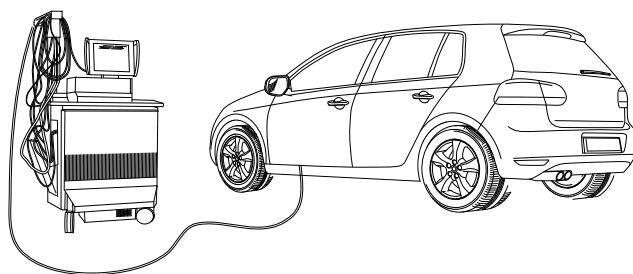

Coding Golf 7 with VCDS, please note:

The procedure described below for encoding and enabling the trailer mode only serves for a general orientation and can vary greatly depending on the model (motorisation / equipment). If necessary less or further control units will have to be adapted.

- **After connecting to VCDS, the "69 trailer function" controller has to be set to encoded in the _19 installation list.**
- **Coding EZE_09 (electronic central electric controller; Login 31347)**
Diagnosis / Networking plan / Controller self-diagnosis
encode hitch_ecu > installed
Vehicles from (MJ 2017>>) adjustment > channel -integration trailer control unit > installed
- **Coding ZKS_46 (Central module convenience system)**
trailer monitoring > put on active trailer control unit > installed
- **Coding_03 (Brake Electronics; Login 61378)**
Adjustment > channel - trailer stabilization,
change value to > active
- **Encoding SWA_3C (Lane Change Assist)**
ECU for draw bar > with ECU for draw bar
- **Encoding SCH_17 (Dash panel insert)**
Trailer > yes
- **Encoding RFK_6C (reverse camera system)**
equipment_ahk > installed
- **Encoding STF_74 (chassis control system)**
Trailer > installed
- **Encoding EPH_76 (PDC controller)**
Trailer > trailer device can be removed manually
- **Encoding DiS_13 (controler distance control, possible Login 20103)**
Control module for towing sens > installed or
Control module for trailer recognition > installed
(Byte 03 Bit 03)
- **Encoding FFF_A5 (front sensor system controller)**
AAG > coded
- **Encoding HDE_6D (boot lid electronics controller)**
Trailer > installed

Important note on encoding and activating in trailer mode

The aforementioned settings are carried out in the vehicle's electrical system and saved locally. During general updates for the vehicle software (for example, within the scope of service or repair work) the settings may be overwritten and deleted under certain circumstances. At this case, the trailer mode activation has to be updated again locally after the update. Diagnostic information relating to the trailer mode that may appear during variance comparisons with the data saved in the manufacturer's works, may form the basis of the local activation

F

I

Codage Golf 7 avec VCDS, attention:

La procédure de codage ou d'activation du fonctionnement avec remorque décrite ci-dessous sert uniquement d'orientation générale et peut varier fortement d'un modèle à l'autre (motorisation / équipement). Le cas échéant, il peut s'avérer nécessaire d'adapter moins ou d'autres dispositifs de commande.

- **Une fois la connexion avec VCDS établie, mettre l'appareil de commande «69 fonctionnement avec remorque sur «codé dans _19 la liste d'assemblage théorique**
- **Codage EZE_09 (appareil de commande de la centrale électrique électronique; Login 31347)**
Diagnostic / Plan de mise en réseau / Autodiagnostic appareil de commande, codage hitch_ecu > installed; Véhicules depuis (MJ 2017 >>) Ajustement > canal - intégration de l'unité de remorque > installée
- **Codage ZKS_46 (Système de commodité de module Central) trailer monitoring > mettre actif trailer control unit > monté**
- **Codage_03 (Électronique de freinage; Login 61378)**
Ajustement > canal – stabilisation de la remorque, valeur sur > activé
- **Codage SWA_3C (l'aide au changement de voie)**
ECU for draw bar > with ECU for draw bar
- **Codage SCH_17 (tableau de commande insert)**
Remorque > oui
- **Codage RFK_6C (Système de caméra de recul)**
equipment_ahk > monté
- **Codage STF_74 (Système de commande de chassis)**
Remorque > monté
- **Codage EPH_76 (aide au stationnement appareil de commande)**
Remorque > dispositif de remorque; démontable à la main
- **Codage DiS_13 (régulateur de distance appareil de commande, possibilité Login 20103)**
Control module for towing sens > monté ou
Control module for trailer recognition > monté (Byte 03 Bit 03)
- **Codierung FFF_A5 (capteurs avant appareil de commande)** AAG > coded
- **Codage HDE_6D (appareil de commande de l'électronique du hayon électrique)**
Remorque > monté

Remarque importante sur le codage ou sur l'activation du fonctionnement avec remorque

Les réglages mentionnés ci-dessus sont effectués dans le réseau de bord du véhicule et sauvegardés localement. Lors des mises à jour générales du logiciel du véhicule (par exemple dans le cadre de travaux de maintenance ou de réparation), ces réglages peuvent dans certaines circonstances être écrasés et supprimés. Dans ce cas, l'activation du fonctionnement avec remorque doit être à nouveau actualisée localement après la mise à jour. L'activation locale peut le cas échéant être causée par des remarques de diagnostic relatives au fonctionnement avec remorque susceptibles d'être générées lors de la comparaison entre valeurs théoriques/valeurs réelles effectuées avec les valeurs conservées dans l'usine du constructeur..

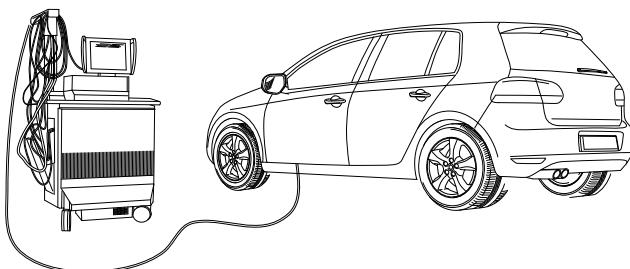

Codifica Golf 7 con VCDS, attenzione:

Esercizio rimorchio descritto qui di seguito serve esclusivamente come orientamento generale e può variare radicalmente a seconda del modello (motorizzazione / dotazione). È possibile che meno o altre centraline debbano essere adeguate.

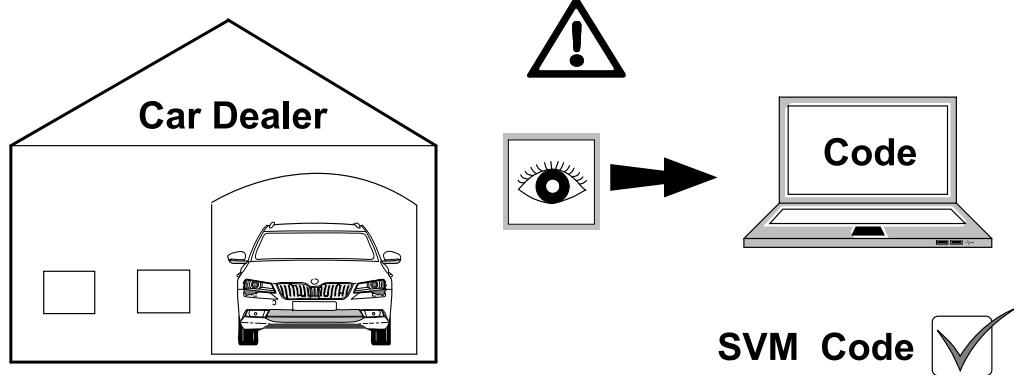

- **Dopo la connessione con VCDS, nella lista. _19 d'installazione nominale la centrale 69 Funzione rimorchio" deve essere codificata.**
- **Codifica EZE_09 (centralina del sistema elettronico centrale elettronico; Login 31347)**
Schema di collegamento in rete / Autodiagnosi / centralina / codifica > hitch_ecu > installed
Veicolo da (MJ 2017>>) Regolazione -> canale-integrazione centralina rimorchio -> installata
- **Codifica ZKS_46 (Sistema di convenienza di modulo centrale)**
trailer monitoring > attivare / trailer control unit > installato
- **Codifica _03 (Frenatura elettronica; Login 61378)**
Regolazione > canale – stabilizzazione rimorchio, cambio valore su > attiv
- **Codifica SWA_3C (Cambio corsia Assist)**
ECU for draw bar > with ECU for draw bar
- **Codifica SCH_17 (Inserto cruscotto)**
Trailer > si
- **Codifica RFK_6C (sistema di telecamere retromarcia)**

- **Codifica STF_74 (sistema di controllo del telaio)**
Rimorchio > installato
- **Codifica EPH_76 (centralina ausilio di parcheggio)**
Rimorchio > dispositivo rimorchio rimovibile manualmente
- **Codifica DiS_13 (centralina regolazione distanza, possibile Login 20103)**
Control module for towing sens > installato o
Control module for trailer recognition > installato (Byte 03 Bit 03)
- **Codifica FFF_A5 (centralina sensori frontali)**
AAG > coded
- **Codifica HDE_6D (centralina sistema elettronico coperchio portabagagli)**
Rimorchio > installato

Avvertenza importante per la codifica_o. l'attivazione per funzionamento con rimorchio

Le impostazioni indicate in precedenza vengono effettuate nella rete di bordo del veicolo e memorizzate localmente. Nel caso di update generali del software del veicolo (ad esempio nell'ambito dei lavori di assistenza e messa a punto), in particolari circostanze è possibile sovrascrivere e cancellare nuovamente queste impostazioni. In questo caso dopo l'update deve essere nuovamente aggiornata localmente l'attivazione per funzionamento con rimorchio. Le avvertenze di diagnosi in riferimento al funzionamento con rimorchio, generate durante una comparazione dei valori nominali/effettivi con i dati inseriti in fabbrica dal costruttore, potrebbero dipendere dall'attivazione locale

Anhänger > verbaut

Wichtiger Hinweis zu Codierung bzw. Freischaltung auf Anhängerbetrieb

Die vorab genannten Einstellungen werden im Bordnetz des Fahrzeuges vorgenommen und lokal abgespeichert. Bei generellen Updates der Fahrzeugsoftware (beispielsweise im Rahmen von Service- oder Instandsetzungsarbeiten) können diese Einstellungen unter Umständen wieder überschrieben und gelöscht werden. In diesem Fall muss die Freischaltung auf Anhängerbetrieb nach dem Update noch einmal lokal aktualisiert werden. Diagnosehinweise in Bezug auf Anhängerbetrieb, die bei Soll-/Ist- Vergleichen mit den im Herstellerwerk hinterlegten Daten auftreten können, liegen ggf. der lokalen Freischaltung zu Grunde.

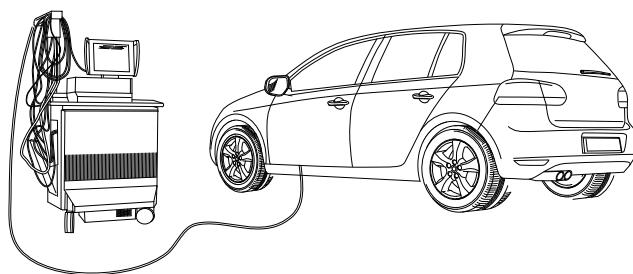

Coding Golf 7 with VCDS, please note:

The procedure described below for encoding and enabling the trailer mode only serves for a general orientation and can vary greatly depending on the model (motorisation / equipment). If necessary less or further control units will have to be adapted.

- **After connecting to VCDS, the "69 trailer function" controller has to be set to encoded in the _19 installation list.**
- **Coding EZE_09 (electronic central electric controller; Login 31347)**
Diagnosis / Networking plan / Controller self-diagnosis
encode hitch_ecu > installed
Vehicles from (MJ 2017>>) adjustment > channel -integration trailer control unit > installed
- **Coding ZKS_46 (Central module convenience system)**

- **Encoding DiS_13 (controler distance control, possible Login 20103)**
Control module for towing sens > installed or
Control module for trailer recognition > installed
(Byte 03 Bit 03)
- **Encoding FFF_A5 (front sensor system controller)**
AAG > coded
- **Encoding HDE_6D (boot lid electronics controller)**
Trailer > installed

Important note on encoding and activating in trailer mode

The aforementioned settings are carried out in the vehicle's electrical system and saved locally. During general updates for the vehicle software (for example, within the scope of service or repair work) the settings may be overwritten and deleted under certain circumstances. At this case, the trailer mode activation has to be updated again locally after the update. Diagnostic information relating to the trailer mode that may appear during variance comparisons with the data saved in the manufacturer's works, may form the basis of the local activation

F

I

Codage Golf 7 avec VCDS, attention:

La procédure de codage ou d'activation du fonctionnement avec remorque décrite ci-dessous sert uniquement d'orientation générale et peut varier fortement d'un modèle à l'autre (motorisation / équipement). Le cas échéant, il peut s'avérer nécessaire d'adapter moins ou d'autres dispositifs de commande.

- **Une fois la connexion avec VCDS établie, mettre l'appareil de commande «69 fonctionnement avec remorque sur «codé dans _19 la liste d'assemblage théorique**
- **Codage EZE_09 (appareil de commande de la centrale électrique électronique; Login 31347)**
Diagnostic / Pian de mise en réseau / Autodiagnosi appareil de commande, codage hitch_ecu > installed; Véhicules depuis (MJ 2017 >>) Ajustement > canal - intégration de l'unité de remorque > installée
- **Codage ZKS_46 (Système de commodité de module Central) trailer monitoring > mettre actif trailer control unit > monté**
- **Codage_03 (Électronique de freinage; Login 61378)**
Ajustement > canal – stabilisation de la remorque, valeur sur > activé
- **Codage SWA_3C (l'aide au changement de voie)**
ECU for draw bar > with ECU for draw bar
- **Codage SCH_17 (tableau de commande insert)**
Remorque > oui
- **Codage RFK_6C (Système de caméra de recul)**
equipment_ahk > monté
- **Codage STF_74 (Système de commande de chassis)**
Remorque > monté
- **Codage EPH_76 (aide au stationnement appareil de commande)**
Remorque > dispositif de remorque; démontable à la main
- **Codage DiS_13 (régulateur de distance appareil de commande, possibilité Login 20103)**
Control module for towing sens > monté ou
Control module for trailer recognition > monté (Byte 03 Bit 03)
- **Codierung FFF_A5 (capteurs avant appareil de commande)** AAG > coded
- **Codage HDE_6D (appareil de commande de l'électronique du hayon électrique)**
Remorque > monté

Remarque importante sur le codage ou sur l'activation du fonctionnement avec remorque

Les réglages mentionnés ci-dessus sont effectués dans le réseau de bord du véhicule et sauvegardés localement. Lors des mises à jour générales du logiciel du véhicule (par exemple dans le cadre de travaux de maintenance ou de réparation), ces réglages peuvent dans certaines circonstances être écrasés et supprimés. Dans ce cas, l'activation du fonctionnement avec remorque doit être à nouveau actualisée localement après la mise à jour. L'activation locale peut le cas échéant être causée par des remarques de diagnostic relatives au fonctionnement avec remorque susceptibles d'être générées lors de la comparaison entre valeurs théoriques/valeurs réelles effectuées avec les valeurs conservées dans l'usine du constructeur..

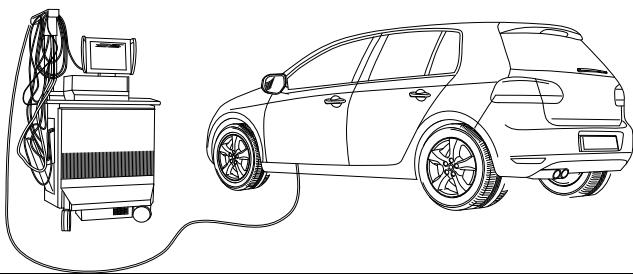

Codifica Golf 7 con VCDS, attenzione:

Esercizio rimorchio descritto qui di seguito serve esclusivamente come orientamento generale e può variare radicalmente a seconda del modello (motorizzazione / dotazione). È possibile che meno o altre centraline debbano essere adeguate.

- **Dopo la connessione con VCDS, nella lista. _19 d'installazione nominale la centrale 69 Funzione rimorchio" deve essere codificata.**
- **Codifica EZE_09 (centralina del sistema elettronico centrale elettronico; Login 31347)**
Schema di collegamento in rete / Autodiagnosi / centralina / codifica > hitch_ecu > installed Veicolo da (MJ 2017>>) Regolazione -> canale-integrazione centralina rimorchio -> installata

Rimorchio > installato

Avvertenza importante per la codifica_o. l'attivazione per funzionamento con rimorchio

Le impostazioni indicate in precedenza vengono effettuate nella rete di bordo del veicolo e memorizzate localmente. Nel caso di update generali del software del veicolo (ad esempio nell'ambito dei lavori di assistenza e messa a punto), in particolari circostanze è possibile sovrascrivere e cancellare nuovamente queste impostazioni. In questo caso dopo l'update deve essere nuovamente aggiornata localmente l'attivazione per funzionamento con rimorchio. Le avvertenze di diagnosi in riferimento al funzionamento con rimorchio, generate durante una comparazione dei valori nominali/effettivi con i dati inseriti in fabbrica dal costruttore, potrebbero dipendere dall'attivazione locale

E

NL

Codificación de Golf 7 noc VCDS, por favor, tener en cuenta

El proceso descrito codificación para la codificación y/o habilitación para el servicio con remolque sólo sirve para una orientación general y puede variar considerablemente dependiendo del modelo (motorización/equipamiento). En caso dado puede que tengan que adaptarse menos a otros reguladores.

- **Después de haber establecido la conexión con VCDS** se deberá ajustar el **controlador 69 función de remolque** en **_19 la lista de dispositivos a codificar**
- **Codificación EZE_09 (controlador del sistema eléctrico central electrónico; Login 31347)**
Esquema de interconexión / Autodiagnosis del controlador

Remolque > montado

Nota importante sobre la codificación y/o habilitación del modo remolque

Los ajustes anteriormente mencionados se llevan a cabo en el sistema eléctrico de a bordo y se guardan de forma local. Al realizar actualizaciones generales de software del vehículo (por ejemplo con motivo de trabajos de mantenimiento o reparación) es posible que estos ajustes se vuelvan a borrar y sobrescribir. En tal caso se deberá volver a actualizar la habilitación del modo remolque de forma local después de la actualización. Los avisos de diagnóstico relacionados con el modo remolque, que puedan aparecer en caso de comparación de datos teóricos/reales con los datos depositados en la fábrica, se pueden deber a la habilitación local

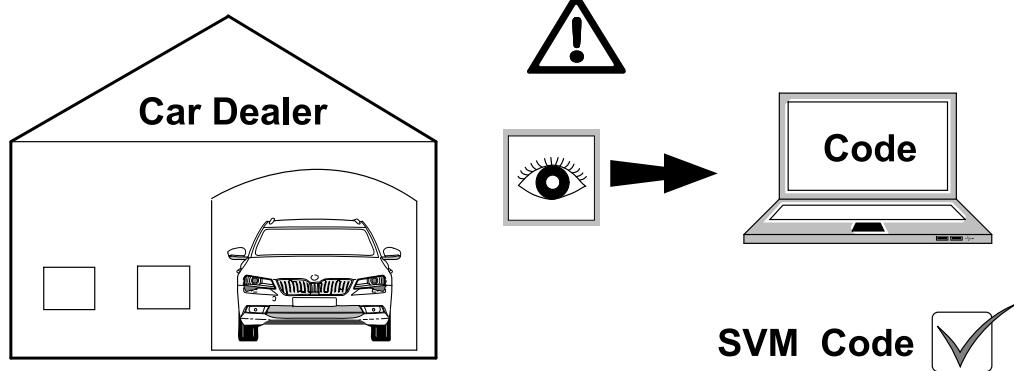

Codering VW Golf 7 met VCDS, let op a.u.b.:

Het hieronder omschreven proces voor de codering van de aanhangwagen functie dient uitsluitend ter algemene oriëntatie en kan afhankelijk van model (motorisering / uitvoering) sterk variëren. Indien nodig, moeten mindere of andere besturingsapparaten worden aangepast.

- **Na aansluiting met het on board diagnostisch systeem VCDS moet in de _19 installatie lijst, de regeleenheid '69- aanhangwagenfunctie' worden ingesteld alszijnde 'gecodeerd'.**

Belangrijke aanwijzing voor het coderen, dan wel deblokken van het anhangerbesturingssysteem

De eerder genoemde instellingen worden uitgevoerd op de boordcomputer van uw voertuig en ze worden lokaal opgeslagen. Het is echter mogelijk dat bij een algemene update van uw voertuigsoftware (bijvoorbeeld in het kader van een servicebeurt Of tijdens herstelwerkzaamheden) uw instellingen onder bepaalde omstandigheden worden overgeschreven dan wel gewist. In dat geval moet de deblokkenning van het aanhangerbesturingssysteem na de update nog een keer lokaal worden geactualiseerd. Eventueel kunnen er diagnostische instructies/meldingen ten aanzien van het aanhangerbesturingssysteem worden gegenereerd door het feit dat er lokaal wordt gedeblokkeerd - die situatie kan zich voordoen wanneer de fabrieksinstellingen worden gebruikt in vergelijkingen tussen een actuele en een gewenste situatie

Anhänger > verbaut

Wichtiger Hinweis zu Codierung bzw. Freischaltung auf Anhängerbetrieb

Die vorab genannten Einstellungen werden im Bordnetz des Fahrzeuges vorgenommen und lokal abgespeichert. Bei generellen Updates der Fahrzeugsoftware (beispielsweise im Rahmen von Service- oder Instandsetzungsarbeiten) können diese Einstellungen unter Umständen wieder überschrieben und gelöscht werden. In diesem Fall muss die Freischaltung auf Anhängerbetrieb nach dem Update noch einmal lokal aktualisiert werden. Diagnosehinweise in Bezug auf Anhängerbetrieb, die bei Soll-/Ist- Vergleichen mit den im Herstellerwerk hinterlegten Daten auftreten können, liegen ggf. der lokalen Freischaltung zu Grunde.

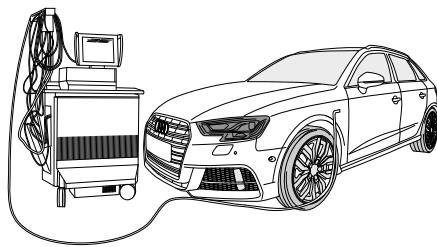

Coding A3 with VCDS, please note:

The procedure described below for encoding and enabling the trailer mode only serves for a general orientation and can vary greatly depending on the model (motorisation / equipment). If necessary less or further control units will have to be adapted.

- **After connecting to VCDS, the "69 trailer function" controller has to be set to encoded in the _19 installation list.**
- **Coding EZE_09 (electronic central electric controller; Login 31347)**
Diagnosis / Networking plan / Controller self-diagnosis

AAG > coded
- **Encoding HDE_6D (boot lid electronics controller)**
Trailer > installed

Important note on encoding and activating in trailer mode

The aforementioned settings are carried out in the vehicle's electrical system and saved locally. During general updates for the vehicle software (for example, within the scope of service or repair work) the settings may be overwritten and deleted under certain circumstances. At this case, the trailer mode activation has to be updated again locally after the update. Diagnostic information relating to the trailer mode that may appear during variance comparisons with the data saved in the manufacturer's works, may form the basis of the local activation

F

I

Codage A3 avec VCDS, attention:

La procédure de codage ou d'activation du fonctionnement avec remorque décrite ci-dessous sert uniquement d'orientation générale et peut varier fortement d'un modèle à l'autre (motorisation / équipement). Le cas échéant, il peut s'avérer nécessaire d'adapter moins ou d'autres dispositifs de commande.

- **Une fois la connexion avec VCDS établie, mettre l'appareil de commande «69 fonctionnement avec remorque sur «codé dans _19 la liste d'assemblage théorique**
- **Codage EZE_09 (appareil de commande de la centrale électrique électronique; Login 31347)**
Diagnostic / Plan de mise en réseau / Autodiagnostic appareil de commande, codage hitch_ecu > installed; Véhicules depuis (MJ 2017 >>) Ajustement > canal - intégration de l'unité de remorque > installée

Remorque > oui
- **Codage RFK_6C (Système de caméra de recul)**
equipment_ahk > monté
- **Codage STF_74 (Système de commande de chassis)**
Remorque > monté
- **Codage EPH_76 (aide au stationnement appareil de commande)**
Remorque > dispositif de remorque; démontable à la main
- **Codage DiS_13 (régulateur de distance appareil de commande, possibilité Login 20103)**
Control module for towing sens > monté ou
Control module for trailer recognition > monté (Byte 03 Bit 03)
- **Codierung FFF_A5 (capteurs avant appareil de commande)** AAG > coded
- **Codage HDE_6D (appareil de commande de l'électronique du hayon électrique)**
Remorque > monté

Remarque importante sur le codage ou sur l'activation du fonctionnement avec remorque

Les réglages mentionnés ci-dessus sont effectués dans le réseau de bord du véhicule et sauvegardés localement. Lors des mises à jour générales du logiciel du véhicule (par exemple dans le cadre de travaux de maintenance ou de réparation), ces réglages peuvent dans certaines circonstances être écrasés et supprimés. Dans ce cas, l'activation du fonctionnement avec remorque doit être à nouveau actualisée localement après la mise à jour. L'activation locale peut le cas échéant être causée par des remarques de diagnostic relatives au fonctionnement avec remorque susceptibles d'être générées lors de la comparaison entre valeurs théoriques/valeurs réelles effectuées avec les valeurs conservées dans l'usine du constructeur..

Codifica A3 con VCDS, attenzione:

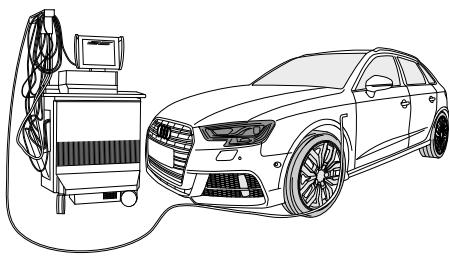

Esercizio rimorchio descritto qui di seguito serve esclusivamente come orientamento generale e può variare radicalmente a seconda del modello (motorizzazione / dotazione). È possibile che meno o altre centraline debbano essere adeguate.

- **Dopo la connessione con VCDS, nella lista "d'installazione nominale la centralina 69 Funzione rimorchio" deve essere codificata.**

- **Codifica HDE_6D (centralina sistema elettronico coperchio portabagagli)**
Rimorchio > installato

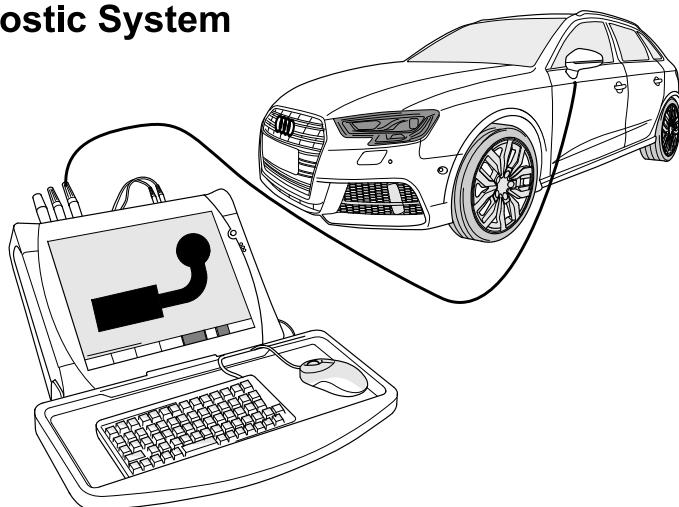

Avvertenza importante per la codifica o. l'attivazione per funzionamento con rimorchio

Le impostazioni indicate in precedenza vengono effettuate nella rete di bordo del veicolo ememorizzate localmente. Nel caso di update generali dei software del veicolo (ad esempio n_ell'ambito d_ei lavori di assistenza e messa a punto), in particolare in circostanze è possibile sovrascrivere e cancellare nuovamente queste impostazioni. In questo caso dopo l'update deve essere nuovamente aggiornata localmente l'attivazione per funzionamento con rimorchio. Le avvertenze di diagnosi in riferimento al funzionamento con rimorchio, generate durante una comparazione dei valori nominali/effettivi con i dati inseriti in fabbrica dal costruttore, potrebbero dipendere dall'attivazione locale

OPTION B - vehicle coding

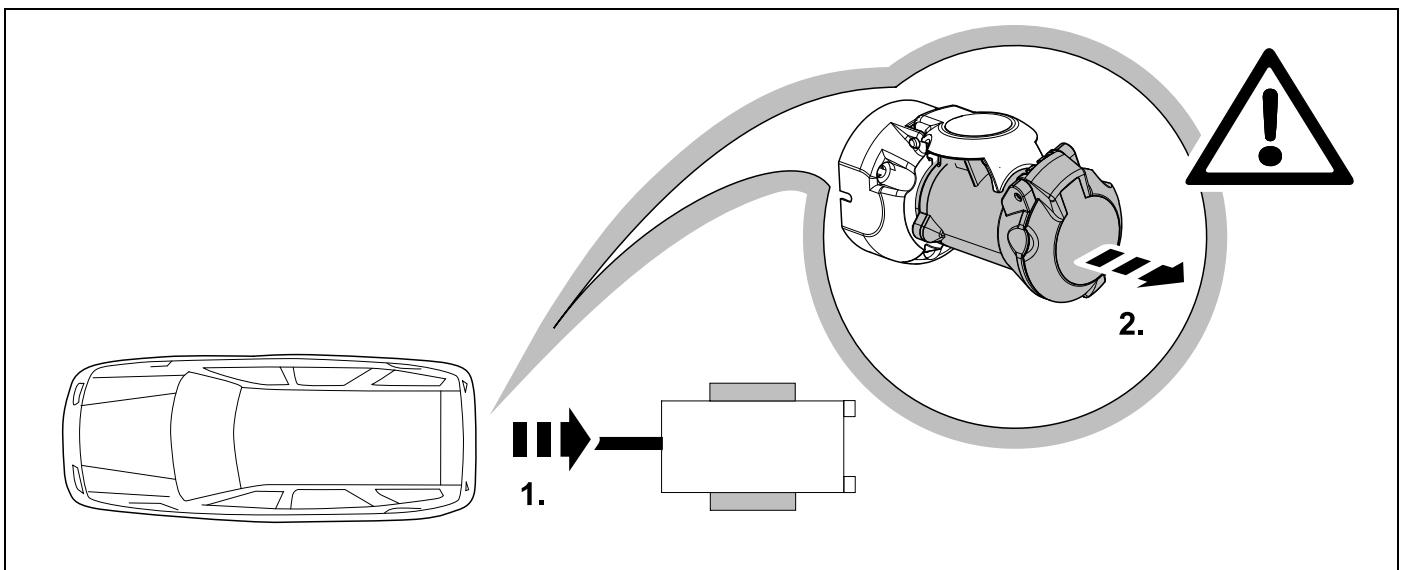

E	NL
<p>Codificación de A3 noc VCDS, por favor, tener en cuenta</p> <p>El proceso descrito codificación para la codificación y/o habilitación para el servicio con remolque sólo sirve para una orientación general y puede variar considerablemente dependiendo del modelo (motorización/equipamiento). En caso dado puede que tengan que adaptarse menos u otros reguladores.</p> <ul style="list-style-type: none"> ➤ Después de haber establecido la conexión con VCDS se deberá ajustar el controlador 69 función de remolque" en _19 la lista de dispositivos a codificar ➤ Codificación EZE_09 (controlador del sistemaeléctrico central electrónico; Login 31347) <p>Esquema de interconexión / Autodiagnosis del controlador Codificación hitch_ecu > installed; Vehículos desde (MJ 2017 >>) Adaptación -> canal - integración de la unidad de remolque -> instalada</p> <ul style="list-style-type: none"> ➤ Codificación ZKS_46 (Sistema de confort de módulo central) trailer monitoring > poner en activo trailer control unit > montado ➤ Codificación _03 (Frenos Electrónica; Login 61378) <p>Adaptación > canal - estabilización del remolque, valor en > activado</p> <p>Codificación SWA_3C (asistente de carnbio de caml) ECU for draw bar > with ECU for draw bar</p> <p>Codificación SCH_17 (Cuadro de instrumentos) Trailer > si</p> <ul style="list-style-type: none"> ➤ Codificación RFK_6C (sistema de cámara de reversa) equipment_ahk > montado ➤ Codificación STF_74 (sistema de control de chasis) Remolque > montado ➤ Codificación EPH_76 (controlador del sistema de ayuda al aparcamiento) desmontable a mano ➤ Codificación DiS_13 (controlador del sistema de regulación de distancia, Login de acceso posible 20103) Control module for towing sens > montado o Control module for trailer recognition > montado (Byte 03 Bit 03) ➤ Codificación FFF_A5 (controlador del sistema de sensores trontales) AAG > coded ➤ Codificación HDE_6D (controlador del sistema electrónico de la puerta del maletero) Remolque > montado <p>Nota importante sobre la codificación y/o habilitación del modo remolque</p> <p>Los ajustes anteriormente mencionados se llevan a cabo en el sistema eléctrico de a bordo y se guardan de forma local. Al realizar actualizaciones generales de software del vehículo (por ejemplo con motivo de trabajos de mantenimiento o reparación) es posible que estos ajustes se vuelvan a borrar y sobrescribir. En tal caso se deberá volver a actualizar la habilitación del modo remolque de forma local después de la actualización. Los avisos de diagnosis relacionados con el modo remolque, que puedan aparecer en caso de comparación de datos teóricos/reales con los datos depositados en la fábrica, se pueden deber a la habilitación local</p>	<p>Codering A3 met VCDS, let op a.u.b.:</p> <p>Het hieronder omschreven proces voor de codering van de aanhangwagen functie dient uitsluitend ter algemene oriëntatie en kan afhankelijk van model (motorisering / uitvoering) sterk variëren. Indien nodig, moeten mindere of andere besturingsapparaten worden aangepast.</p> <ul style="list-style-type: none"> ➤ Na aansluiting met het on board diagnostisch systeem VCDS moet in de _19 installatie lijst, de regeleenheid '69- aanhangwagenfunctie' worden ingesteld alszijnde 'gecodeerd'. ➤ Codering EZE_09 (Aansturingsapparaat voor .de elektronische centrale elektriciteitsvoorziening; Login 31347) <p>Diagnose Aansluitingsdiagram / Zelfdiagnose van de controller / Coderen hitch_ecu > installed Voertuigen vanaf (MY 2017>>) Wijziging – kanaal Integreren trailer controle unit – geïnstalleerd</p> <ul style="list-style-type: none"> ➤ Codering ZKS_46 (Centrale module gemak systeem) trailer monitoring > gezet op actief trailer control unit > geïnstalleerd ➤ Codering _03 (Rem electronica; Login 61378) <p>Wijziging > Kanaal – trailer stabilisatie, wijzig waarde naar > actief</p> <p>Codering SWA_3C (Rijstrookwisselhulp) ECU for draw bar > with ECU for draw bar</p> <p>Codering SCH_17 (Inzetstuk Dash) Trailer > ja</p> <ul style="list-style-type: none"> ➤ Codering RFK_6C (achteruitrijcamera systeem) equipment_ahk > geïnstalleerd ➤ Codering STF_74 (chassis controlesysteem) aanhanger > geïnstalleerd ➤ Codering EPH_76 (controller parkeersysteem) aanhanger > aanhangerunit handmatig loste koppelen ➤ Codering DiS_13 (controller automatische afstandscontrole, mogelijke Login 20103) Control module for towing sens > geïnstalleerd of Control module for trailer recognition > geïnstalleerd (Byte 03 Bit 03) ➤ Codering FFF_A5 (controller sensoren voorzijde) AAG > coded ➤ Codering HDE_6D (controller achterklepelectronica) Aanhanger > geïnstalleerd <p>Belangrijke aanwijzing voor het coderen, dan wel deblokkeren van het anhangerbesturingssysteem</p> <p>De eerder genoemde instellingen worden uitgevoerd op de boordcomputer van uw voertuig en ze worden lokaal opgeslagen. Het is echter mogelijk dat bij een algemene update van uw voertuigsoftware (bijvoorbeeld in het kader van een servicebeurt Of tijdens herstelwerkzaamheden) uw instellingen onder bepaalde omstandigheden worden overgeschreven dan wel gewist. In dat geval moet de deblokkening van het aanhangerbesturingssysteem na de update nog een keer lokaal worden geactualiseerd. Eventueel kunnen er diagnostische instructies/meldingen ten aanzien van het aanhangerbesturingssysteem worden gegenereerd door het feit dat er lokaal wordt gedeblokkeerd - die situatie kan zich voordoen wanneer de fabrieksinstellingen worden gebruikt in vergelijkingen tussen een actuele en een gewenste situatie</p>

Diagnostic System

D	GB	F
<p>Die Aktivierung der Anhängerfunktionen im Fahrzeug wird hier beispielhaft an einem Diagnose-System Hella Gutmann mega macs PC (V52) beschrieben:</p> <ol style="list-style-type: none"> 1. Fahrzeugauswahl 2. In Diagnose wechseln-Kodierung 3. Anhängerkopplung de-/aktivieren 4. Diagnose Interface Bus auswählen 5. Anleitung folgen <p>Fahrzeuge mit Assistenzsystemen:</p> <ol style="list-style-type: none"> 6. AHK an Assistenzsysteme anpassen ausführen 7. Anleitung folgen 8. Diagnose 9. Fehlerspeicher auslesen, ggf. löschen 	<p>Activation of the vehicle's trailer features is described here with the example of a Hella Gutmann mega macs PC (V52) diagnostic system:</p> <ol style="list-style-type: none"> 1. Select vehicle 2. Switch to diagnosis - coding 3. (De)activate trailer coupling 4. Select Diagnose interface bus 5. Follow instructions <p>Vehicles with Advanced Driver Assistance Systems:</p> <ol style="list-style-type: none"> 6. Execute Match trailer coupling with assistance system 7. Follow instructions 8. Diagnosis 9. Read-out error memory, delete, if necessary 	<p>L'activation des fonctions de remorque du véhicule est décrite ici à titre d'exemple sur un système de diagnostic Hella Gutmann mega macs PC (V52) :</p> <ol style="list-style-type: none"> 1. Sélectionner le véhicule 2. Codage passer en mode diagnostic 3. Désactiver/activer l'attelage de remorque 4. Sélectionner interface bus diagnostic 5. Suivre les instructions <p>Véhicules avec systèmes d'assistance :</p> <ol style="list-style-type: none"> 6. Exécuter l'adaptation de l'attelage de remorque sur les systèmes d'assistance 7. Suivre les instructions 8. Diagnostic 9. Lire, le cas échéant, supprimer la mémoire des défauts
I	E	NL
<p>L'attivazione delle funzioni rimorchio sull'autoveicolo è descritta qui, a titolo esemplificativo, su un sistema diagnostico Hella Gutmann mega macs PC (V52):</p> <ol style="list-style-type: none"> 1. selezione autoveicolo 2. in diagnosi variazione codifica 3. disattiva/attiva gancio rimorchio 4. selezionare interfaccia bus diagnosi 5. seguire le istruzioni <p>Autoveicoli con sistemi di assistenza:</p> <ol style="list-style-type: none"> 6. eseguire adeguamento gancio rimorchio su sistemi di assistenza 7. seguire le istruzioni 8. diagnosi 9. leggere, event. cancellare la memoria errori 	<p>La activación de las funciones de remolque en el vehículo se describe en este caso a modo de ejemplo en un sistema de diagnóstico Hella Gutmann mega macs PC (V52):</p> <ol style="list-style-type: none"> 1. Selección de vehículo 2. Cambiar a codificación de diagnóstico 3. De/activar el enganche del remolque 4. Seleccionar el bus de interfaz de diagnóstico 5. Seguir las instrucciones <p>Vehículos con sistemas de asistencia:</p> <ol style="list-style-type: none"> 6. Adaptar AHK a los sistemas de asistencia 7. Seguir las instrucciones 8. Diagnóstico 9. Leer la memoria de fallas, eliminar si es necesario 	<p>De activering van de aanhangerfuncties in het voertuig wordt hier aan de hand van bijvoorbeeld een Hella Gutmann mega macs PC (V52) beschreven:</p> <ol style="list-style-type: none"> 1. Selectie van voertuig 2. In diagnose veranderen-codering 3. Aanhangwagenkoppeling deactiveren/activeren 4. Diagnose interface bus kiezen 5. Instructie opvolgen <p>Voertuigen met hulpsystemen:</p> <ol style="list-style-type: none"> 6. AHK aan hulpsystemen aanpassen uitvoeren 7. Instructie opvolgen 8. Diagnose 9. Foutgeheugen uitlezen, evt. wissen

Control module for towing sens > verbaut oder
Control module for trailer recognition > verbaut
(Byte 03 Bit 03)
- **Codierung FFF_A5 (Frontsensorik Steuergerät)**
AAG > coded
- **Codierung HDE_6D (Heckdeckelelektronik Steuergerät)**
Anhänger > verbaut

Wichtiger Hinweis zu Codierung bzw. Freischaltung auf Anhängerbetrieb

Die vorab genannten Einstellungen werden im Bordnetz des Fahrzeuges vorgenommen und lokal abgespeichert. Bei generellen Updates der Fahrzeugsoftware (beispielsweise im Rahmen von Service- oder Instandsetzungsarbeiten) können diese Einstellungen unter Umständen wieder überschrieben und gelöscht werden. In diesem Fall muss die Freischaltung auf Anhängerbetrieb nach dem Update noch einmal lokal aktualisiert werden. Diagnosehinweise in Bezug auf Anhängerbetrieb, die bei Soll-/Ist- Vergleichen mit den im Herstellerwerk hinterlegten Daten auftreten können, liegen ggf. der lokalen Freischaltung zu Grunde.

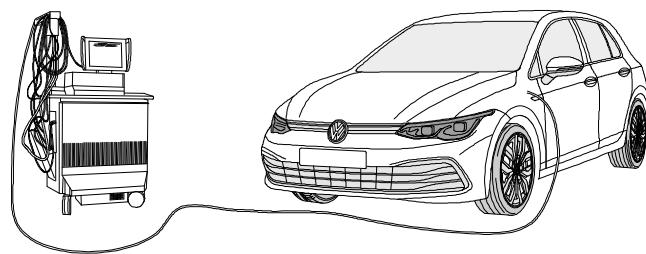

Coding Golf 8 with VCDS, please note:

The procedure described below for encoding and enabling the trailer mode only serves for a general orientation and can vary greatly depending on the model (motorisation / equipment). If necessary less or further control units will have to be adapted.

- **After connecting to VCDS, the "69 trailer function" controller has to be set to encoded in the _19 installation list.**
- **Coding EZE_09 (electronic central electric controller; Login 31347)**
Diagnosis / Networking plan / Controller self-diagnosis
encode hitch_ecu > installed
Vehicles from (MJ 2017>>) adjustment > channel -integration trailer control unit > installed
- **Coding ZKS_46 (Central module convenience system)**
trailer monitoring > put on active trailer control unit > installed
- **Coding_03 (Brake Electronics; Login 61378)**
Adjustment > channel - trailer stabilization,
change value to > active
- **Encoding SWA_3C (Lane Change Assist)**
ECU for draw bar > with ECU for draw bar

- **Encoding EPH_76 (PDC controller)**
Trailer > trailer device can be removed manually
- **Encoding DiS_13 (controler distance control, possible Login 20103)**
Control module for towing sens > installed or
Control module for trailer recognition > installed
(Byte 03 Bit 03)
- **Encoding FFF_A5 (front sensor system controller)**
AAG > coded
- **Encoding HDE_6D (boot lid electronics controller)**
Trailer > installed

Important note on encoding and activating in trailer mode

The aforementioned settings are carried out in the vehicle's electrical system and saved locally. During general updates for the vehicle software (for example, within the scope of service or repair work) the settings may be overwritten and deleted under certain circumstances. At this case, the trailer mode activation has to be updated again locally after the update. Diagnostic information relating to the trailer mode that may appear during variance comparisons with the data saved in the manufacturer's works, may form the basis of the local activation

F

I

Codage Golf 8 avec VCDS, attention:

La procédure de codage ou d'activation du fonctionnement avec remorque décrite ci-dessous sert uniquement d'orientation générale et peut varier fortement d'un modèle à l'autre (motorisation / équipement). Le cas échéant, il peut s'avérer nécessaire d'adapter moins ou d'autres dispositifs de commande.

- **Une fois la connexion avec VCDS établie, mettre l'appareil de commande «69 fonctionnement avec remorque sur «codé dans _19 la liste d'assemblage théorique**
- **Codage EZE_09 (appareil de commande de la centrale électrique électronique; Login 31347)**
Diagnostic / Plan de mise en réseau / Autodiagnostic appareil de commande, codage hitch_ecu > installed; Véhicules depuis (MJ 2017 >>) Ajustement > canal - intégration de l'unité de remorque > installée
- **Codage ZKS_46 (Système de commodité de module Central) trailer monitoring > mettre actif trailer control unit > monté**
- **Codage_03 (Électronique de freinage; Login 61378)**
Ajustement > canal – stabilisation de la remorque, valeur sur > activé
- **Codage SWA_3C (l'aide au changement de voie)**
ECU for draw bar > with ECU for draw bar
- **Codage SCH_17 (tableau de commande insert)**
Remorque > oui
- **Codage RFK_6C (Système de caméra de recul)**
equipment_ahk > monté
- **Codage STF_74 (Système de commande de chassis)**
Remorque > monté
- **Codage EPH_76 (aide au stationnement appareil de commande)**
Remorque > dispositif de remorque; démontable à la main
- **Codage DiS_13 (régulateur de distance appareil de commande, possibilité Login 20103)**
Control module for towing sens > monté ou
Control module for trailer recognition > monté (Byte 03 Bit 03)
- **Codierung FFF_A5 (capteurs avant appareil de commande)** AAG > coded
- **Codage HDE_6D (appareil de commande de l'électronique du hayon électrique)**
Remorque > monté

Remarque importante sur le codage ou sur l'activation du fonctionnement avec remorque

Les réglages mentionnés ci-dessus sont effectués dans le réseau de bord du véhicule et sauvegardés localement. Lors des mises à jour générales du logiciel du véhicule (par exemple dans le cadre de travaux de maintenance ou de réparation), ces réglages peuvent dans certaines circonstances être effacés et supprimés. Dans ce cas, l'activation du fonctionnement avec remorque doit être à nouveau actualisée localement après la mise à jour. L'activation locale peut le cas échéant être causée par des remarques de diagnostic relatives au fonctionnement avec remorque susceptibles d'être générées lors de la comparaison entre valeurs théoriques/valeurs réelles effectuées avec les valeurs conservées dans l'usine du constructeur..

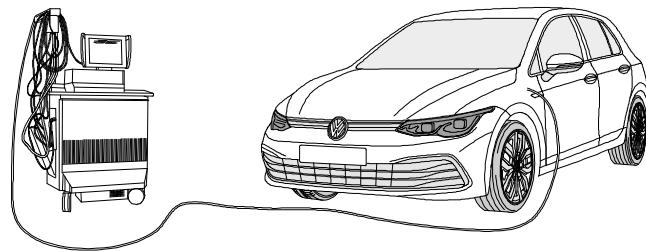

Codifica Golf 8 con VCDS, attenzione:

Esercizio rimorchio descritto qui di seguito serve esclusivamente come orientamento generale e può variare radicalmente a seconda del modello (motorizzazione / dotazione). È possibile che meno o altre centraline debbano essere adeguate.

- **Dopo la connessione con VCDS, nella lista "d'installazione nominale la centrale 69 Funzione rimorchio" deve essere codificata.**
- **Codifica EZE_09 (centralina del sistema elettronico centrale elettronico; Login 31347)**
Schema di collegamento in rete / Autodiagnosi / centralina / codifica > hitch_ecu > installed
Veicolo da (MJ 2017>>) Regolazione -> canale-integrazione centralina rimorchio -> installata

Avvertenza importante per la codifica_o. l'attivazione per funzionamento con rimorchio

Le impostazioni indicate in precedenza vengono effettuate nella rete di bordo del veicolo ememorizzate localmente. Nel caso di update generali dei software del veicolo (ad esempio n_ell'ambito d_ei lavori di assistenza e messa a punto), in particolari circostanze è possibile sovrascrivere e cancellare nuovamente queste impostazioni. In questo caso dopo l'update deve essere nuovamente aggiornata localmente l'attivazione per funzionamento con rimorchio. Le avvertenze di diagnosi in riferimento al funzionamento con rimorchio, generate durante una comparazione dei valori nominali/effettivi con i dati inseriti in fabbrica dal costruttore, potrebbero dipendere dall'attivazione locale

Codificación de Golf 8 con VCDS, por favor, tener en cuenta

El proceso descrito codificación para la codificación y/o habilitación para el servicio con remolque sólo sirve para una orientación general y puede variar considerablemente dependiendo del modelo (motorización/equipamiento). En caso dado puede que tengan que adaptarse menos a otros reguladores.

- **Después de haber establecido la conexión con VCDS** se deberá ajustar el **controlador 69 función de remolque** en **_19 la lista de dispositivos a codificar**
- **Codificación EZE_09 (controlador del sistema eléctrico central electrónico; Login 31347)**
Esquema de interconexión / Autodiagnosis del controlador
Codificación hitch_ecu > installed;
Vehículos desde (MJ 2017 >>) Adaptación -> canal - integración de la unidad de remolque -> instalada

- **Codificación EPH_76 (controlador del sistema de aparcamiento)** ayuda al desmontable a mano
- **Codificación DiS_13 (controlador del sistema de regulación de distancia, Login de acceso posible)** 20103
Control module for towing sens > montado o
Control module for trailer recognition > montado (Byte 03 Bit 03)
- **Codificación FFF_A5 (controlador del sistema de sensores frontales)** AAG > coded
- **Codificación HDE_6D (controlador del sistema electrónico de la puerta del maletero)**
Remolque > montado

Nota importante sobre la codificación y/o habilitación del modo remolque

Los ajustes anteriormente mencionados se llevan a cabo en el sistema eléctrico de a bordo y se guardan de forma local. Al realizar actualizaciones generales de software del vehículo (por ejemplo con motivo de trabajos de mantenimiento o reparación) es posible que estos ajustes se vuelvan a borrar y sobrescribir. En tal caso se deberá volver a actualizar la habilitación del modo remolque de forma local después de la actualización. Los avisos de diagnóstico relacionados con el modo remolque, que puedan aparecer en caso de comparación de datos teóricos/reales con los datos depositados en la fábrica, se pueden deber a la habilitación local

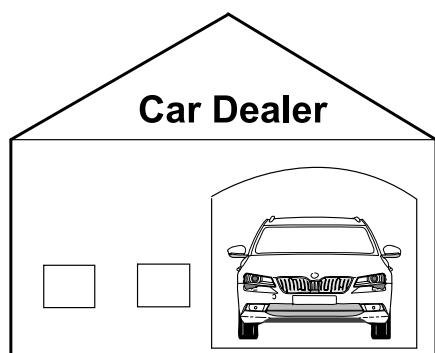

Codering VW Golf 8 met VCDS, let op a.u.b.:

Het hieronder omschreven proces voor de codering van de aanhangwagen functie dient uitsluitend ter algemene oriëntatie en kan afhankelijk van model (motorisering / uitvoering) sterk variëren. Indien nodig, moeten mindere of andere besturingsapparaten worden aangepast.

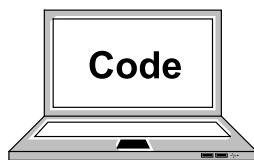

- **Na aansluiting met het on board diagnostisch systeem VCDS moet in de _19 installatie lijst, de regeleenheid '69- aanhangwagenfunctie' worden ingesteld alszijnde 'gecodeerd'.**
- **Codering EZE_09 (Aansturingsapparaat voor de elektronische centrale elektriciteitsvoorziening; Login 31347)**

AAG > coded
- **Codering HDE_6D (controller achterklepelectronica)**
Aanhanger > geïnstalleerd

Belangrijke aanwijzing voor het coderen, dan wel deblokken van het aanhangerbesturingssysteem

De eerder genoemde instellingen worden uitgevoerd op de boordcomputer van uw voertuig en ze worden lokaal opgeslagen. Het is echter mogelijk dat bij een algemene update van uw voertuigsoftware (bijvoorbeeld in het kader van een servicebeurt Of tijdens herstelwerkzaamheden) uw instellingen onder bepaalde omstandigheden worden overgeschreven dan wel gewist. In dat geval moet de deblokkenning van het aanhangerbesturingssysteem na de update nog een keer lokaal worden geactualiseerd. Eventueel kunnen er diagnostische instructies/meldingen ten aanzien van het aanhangerbesturingssysteem worden gegenereerd door het feit dat er lokaal wordt gedeblokkeerd - die situatie kan zich voordoen wanneer de fabrieksinstellingen worden gebruikt in vergelijkingen tussen een actuele en een gewenste situatie

PR : 1D0 / 1M7

SVM Code **D**

Nach Verbau des Elektro-Umrüstsatzes muss eine Online-Codierung bzw. Rückdokumentation mittels ODIS wie folgt durchgeführt werden:

- ODIS- Diagnosetester starten
- Funktion „Diagnose“ starten
- „Sonderfunktionen“ auswählen
- „SW anpassen“ auswählen
- Mit „Prüfung durchführen“ bestätigen
- „Um- und Nachrüstlösungen“ auswählen
- SVM- Code im Eingabefenster eintragen und bestätigen
Code : 3446F
- Anweisungen des Diagnosetesters befolgen

GB

After fitting the electric installation kit, an online coding or a documentation update must be performed using ODIS as follows:

- Start ODIS diagnostic System
- Start “Diagnostic” function
- Select “Special functions”
- Select “Adapt SW”
- Confirm with “Perform test”
- Select “Perform upgrading and retrofitting solutions”
- Enter and confirm SVM- Code in the input window:
Code : 3446F
- Follow the instructions of diagnosis system

F

Après avoir installé le faisceau d’attelage, il est nécessaire d’effectuer un codage en ligne ou une rétro-documentation à l’aide d’ODIS, comme suit :

- Démarrer le système de diagnostic ODIS
- Activer la fonction «Diagnostic»
- Sélectionner «Fonctions Spéciales»
- Sélectionner «Adapter le logiciel»
- Confirmer «Effectuer le contrôle»
- Sélectionner «Rééquipements et post équipements »
- Entrer et confirmer le code SVM dans la fenêtre de saisie
Code : 3446F
- Suivre les instructions du système de diagnostic

I

Dopo aver installato il kit elettrico, è necessario effettuare la codifica online utilizzando il sistema diagnostico ODIS come segue:

- Avviare il sistema diagnostico ODIS
- Avviare la funzione “Diagnostica”
- Selezionare “Funzioni Speciali”
- Selezionare “Adeguamento SW”
- Confermare “Eseguì Test”
- Selezionare “Eseguì aggiornamento /adeguamento”
- Inserire e confermare il codice SVM nella finestra di input
Code : 3446F
- Seguire le istruzioni del sistema diagnostico

E

Tras la instalación del kit eléctrico, es necesario efectuar una codificación online o una documentación retrospectiva a través de ODIS de la manera siguiente:

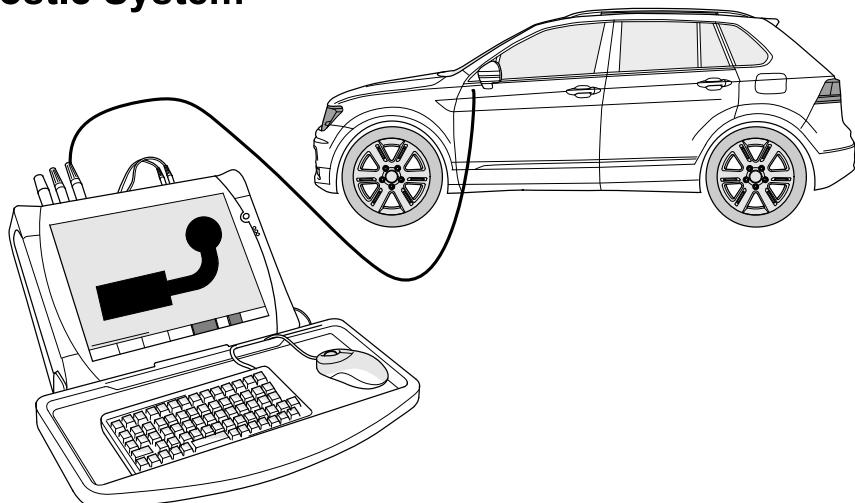

- Iniciar el sistema de diagnóstico ODIS
- Iniciar la función “Diagnóstico”
- Seleccionar “Funciones Especiales”
- Seleccionar “Adaptar Software”
- Confirmar “Efectuar Comprobación”
- Seleccionar “Realizar adaptación y reequipamiento”
- Entrar y confirmar el código SVM en la ventana de entradas
Code : 3446F
- Seguir las instrucciones del sistema de diagnóstico

NL

Na installatie van de kabelset dient online codering plaats te vinden of een update in de documentatie middels ODIS systeem volgens de methode:

- Start ODIS diagnose Systeem
- Start “Diagnostic” functie
- Selecteer “Special functions”
- Selecteer “Adapt SW”
- Bevestig met “Perform test”
- Selecteer “Perform upgrading and retrofitting solutions”
- Enter en bevestig SVM- Code in het invoer veld
Code : 3446F
- Volg de instructies van het diagnose systeem
